API features

Standard Link Actions, version 2025.4.0

The following new or updated API functionality is included in this release.

Exchange data with UNICEF TRVST via MINT Standard Link Actions

Companies can use Standard Link Actions to asynchronously exchange data between TraceLink and the UNICEF systems through the XTT-Link-Actions application, using OAuth2 authentication. This integration automates data exchange between TraceLink and external systems through configurable JavaScript connectors stored in GCX or SCM. These connectors are centrally managed and version-controlled. Standard Link Actions operate asynchronously, allowing secure and reliable data transfer without requiring both systems to be online at the same time. For the UNICEF integration, Standard Link Actions have been configured to support UNICEF's TRVST system transactions. This enables automated, secure exchange of, shipment data, receipt data, iInventory data between TraceLink and UNICEF’s TRVST system.

STE Outbound Integration for UNICEF Partner Data Exchange

The STE Outbound integration enables MINT customers to exchange serialized product movement data with trading partners in real time. MINT customers transmit an STE Outbound file in EPICS format (product pack details) including commissioning, aggregation, and packing events.

This EPICS file is shared directly with UNICEF's TRVST system when UNICEF is a Partner on the TraceLink Network with the MINT customer. As a designated trading Partner, UNICEF receives accurate and timely product data that supports downstream supply chain operations. This integration improves data visibility, ensures compliance with serialization requirements, and strengthens collaboration between the MINT customer and UNICEF across the digital supply network.

Standard Link Actions uses the Serialization Transaction API to push the STE transaction from TraceLink to the UNICEF's TRVST system. After TraceLink processes the STE transaction, it is available for users to view or edit in the Web UI.

STE Outbound integration now supports UNICEF target markets, enabling consistent configuration and data management across all designated regions. Following is the list of countries support:

Country name	Country code
Benin	BE
Botswana	BW
Burundi	BI
Cambodia	KH
Cameroon	CM
Egypt	EG
Ethiopia	ET
Gambia	GM
Ghana	GH
Guinea	GI
India	IN
Kenya	KE
Liberia	LB
Madagascar	MG
Malawi	MW
Mozambique	MO
Nepal	NP
Nigeria	NG
Pakistan	PK
Rwanda	RW
Senegal	SE
Somalia	SO
South Sudan	SS
Tajikistan	TJ
Tanzania	TZ
Togo	TG
Tunisia	TN
Uganda	UG
Zambia	ZM
