TRACELINK UNIVERSITY

Network and app names

Networks in Network Composer and apps in the main menu display in alphabetical order. Partner network names include the owning company name, and classic TTS apps are available from the main menu. Some networks include both OPUS Web UI and classic TTS Web UI screens.

Network

The networks in the network composer and the apps in the main menu display in alphabetical order. If a network name appears more than once in the quick reference table, that means all apps with that network name listed are accessed from that network.

Company names

All Partner network names are prefixed by the name of the company that owns the network (e.g. Kendall Pharma - Serialized Operations Manager).

Classic TTS apps

All classic TTS apps are available through the main menu. Some networks include both OPUS Web UI screens *and* classic TTS Web UI screens.

Navigate to an OPUS network or app

A network allows companies to manage a business ecosystem that includes all of the linked Partners and internal locations necessary to meet specific business goals within an OPUS app.
