Why Your Suppliers Will Want to Participate in TraceLink MINT

Why Your Suppliers Will Want To Participate with MINT

- ✓ Real-time exchange of forecasts and POs enables more precise production planning and better capacity utilization.
- ✓ Improved responsiveness to customer requests for PO changes ensures better on-time, in-full deliveries with higher operational efficiencies.
- ✓ Participating in real-time information exchange improves relationship with customer with no onboarding or integration costs.
- ✓ Single connection to the TraceLink network reduces IT costs related to maintaining outdated modes of information exchange, including EDI and point-to-point integrations.
- ✓ Suppliers can use the single connection to improve the operational efficiency with other customers and their suppliers.

Real-time exchange of forecasts and POs. Improved responsiveness and better customer relationships. No onboarding or integration costs.

These are just some of the reasons why your suppliers will want to join you in using TraceLink MINT, a groundbreaking solution that leverages the proven TraceLink network

to enable fast, simple, and cost-effective integration between supply chain partners, according to Bharath Sundararaman, General Manager of Supply Network Orchestration at TraceLink.
