TRACELINK UNIVERSITY

What's new in the Report Builder, version 2026.1.0 release

Explore upcoming changes in the Report Builder, version 2026.1.0 release.

Release information

This document describes the TraceLink capabilities included in the Release Builder, version 2026.3.0 app release, which is available on Validation and Production on 19 Feb 2026.

The features below are in order of functional relevance (i.e. the typical order in which a user executes a function or task).

⚠ These release notes are subject to change based on the deployment of the release. In the event of changes, the release notes and any related documentation will be updated within one week of release deployment. Deployment completion can be confirmed in the TraceLink Release Notice email.

Patch releases

The following patches are released for this version:

- Report Builder, version 2026.1.1 is available on Validation and Production on

© TraceLink Inc. 2009 - 2025 All Rights Reserved

16 Apr 2026.

These patches are cumulative, and the most recent patch release includes functionality from all previous versions.

Revisions

Date	Revision	Description
19 Feb 2026	01	Initial version.
16 Apr 2026	02	Issue information for the Report Builder, version 2026.1.1 release is added: • 0 issues are added to the **Resolved issues**. • 0 issues are added to the **Known issues**.

UI features

Report Builder, version 2026.1.1

There is no new or updated UI functionality included in this release.

Report Builder, version 2026.1.0

There is no new or updated UI functionality included in this release.

System features

Report Builder, version 2026.1.1

There is no new or updated system functionality included in this release.

Report Builder, version 2026.1.0

The following new or updated system functionality is included in this release.

Create Dynamic Date Filters

Report Builder Creators and Report Users can now create reports and dashboards using existing date filters that automatically adjust based on the current date or time. Instead of relying on fixed ranges (e.g. Last 3 weeks, Last 3 months), users can continue to define relative time windows that extend into the past or future

© TraceLink Inc. 2009 - 2025 All Rights Reserved

and remain accurate as time progresses.

Previously, OPUS Reports and Dashboards (ORD) supported relative date filters that were resolved into fixed date ranges, requiring manual updates and limiting the ability to keep reports and dashboards current over time.

With dynamic date evaluation, reports and dashboards recalculate the applicable date range each time they run, ensuring results reflect the intended time range without manual updates. This capability enables users to build time-aware reports and dashboards that remain consistent over time, improving accuracy for both scheduled executions and on-demand analysis.

Impact analysis

- Interface options:
  - Not applicable
- Business segment impacts:
  - All business segments (both Owners and Partners)

Resolved issues

Report Builder, version 2026.1.1

The purpose of this patch release is to provide internal bug fixes. There are no customer-facing resolved issues in this release.

Report Builder, version 2026.1.0

There are no resolved issues in this release.

Known issues

Report Builder, version 2026.1.1

There are no known issues in this release.
