TRACELINK UNIVERSITY

What's new in the Report Builder, version 2026.3.0 release

Explore what's new in the Release Builder, version 2026.3.0 release. To learn more about what's new in the OPUS Reports and Dashboards 4.0.0 that provides the user interface for this app, see What's new in the Opus Reports and Dashboards, version 4.0.0 release.

Release information

This document describes the TraceLink capabilities included in the Release Builder, version 2026.3.0 app release, which is available on Validation and Production on 15 Oct 2026.

The following apps are impacted by this release and will be updated to the version listed:

- Release Builder, version 2026.3.0

  Solutions supported by this app version:

  - OPUS Reports and Dashboards 4.0.0

The features below are in order of functional relevance (i.e. the typical order in which a user executes a function or task).

⚠ These release notes are subject to change based on the deployment of the release. In the event of changes, the release notes and any related documentation will be updated within one week of release deployment. Deployment completion can be confirmed in the TraceLink Release Notice email.

Revisions

Date	Revision	Description
15 Oct 2026	01	Initial version.

UI features

Report Builder, version 2026.3.0

The following new or updated functionality is included in this release.

Improved Search Results for Query Objects, Reports, and Dashboards

This feature improves how users search for and access Query Objects, Reports, and Dashboards. Users can retrieve the latest version of each object or search for a specific object to view all available versions. For more information about the corresponding solution feature, see the OPUS Reports and Dashboards, solution version 4.0.0 release.

Impact analysis

The impacts for this feature are the same as the Improved Search Results for Query Objects, Reports, and Dashboards feature in the OPUS Reports and Dashboards 4.0.0 release.

Create Reports and Dashboards for Lakehouse Data

This feature adds support for OPUS Metrics and Track & Trace Lakehouse in OPUS Reports and Dashboards (ORD). Users can create Query Objects, run reports and dashboards, and retrieve results using Lakehouse data.For more information about the corresponding solution feature, see the OPUS Reports and Dashboards,

© TraceLink Inc. 2009 - 2025 All Rights Reserved

solution version 4.0.0 release.

Impact analysis

The impacts for this feature are the same as the Create Reports and Dashboards for Lakehouse Data feature in the OPUS Reports and Dashboards 4.0.0 release.

Schedule and Generate Reports for Large Datasets

This enhancement improves reporting scalability and responsiveness in OPUS Reports and Dashboards. Users can work with larger datasets through Scheduled Reports and explore generated report data in Dashboards. For more information about the corresponding solution feature, see the OPUS Reports and Dashboards, solution version 4.0.0 release.

Impact analysis

The impacts for this feature are the same as the Schedule and Generate Reports for Large Datasets feature in the OPUS Reports and Dashboards 4.0.0 release.

System features

Report Builder, version 2026.3.0

The following new or updated system functionality is included in this release.

Use Network Look-up Relationships in Query Objects and Reports

This enhancement expands reporting across Process Networks and provides more complete visibility into related business data. OPUS Reports and Dashboards now supports reporting on business objects related through Network Look-up fields. Report authors can include data from related business objects in reports, even when those objects reside in a different Process Network.

When a report includes data related through a Network Look-up field, ORD automatically identifies the appropriate Process Network and retrieves data from the related business object.

Impact analysis

- Interface options:
  - Not applicable
- Business segment impacts:
  - All business segments (both Owners and Partners)

Subscription-based support for Agentic Reports and Charts

This enhancement supports subscription-based execution of Agentic Reports and charts, enabling users to analyze larger datasets more efficiently.

Users can generate reports and charts using natural language prompts without creating or saving reports, queries, or dashboards. The system processes data asynchronously and displays the results as tables or charts.

The new architecture improves data handling and supports interactive analysis of large datasets without requiring the complete dataset to load in a single response.

Impact analysis

- Interface options:
  - Not applicable
- Business segment impacts:
  - All business segments (both Owners and Partners)

Resolved issues

Report Builder, version 2026.3.0

There are no resolved issues in this release.

Known issues

Report Builder, version 2026.3.0

There are no known issues in this release.
