Transforming the Health System Pharmacy Supply Chain Through DSCSA

The fast-approaching November 2020 Drug Supply Chain Security Act (DSCSA) regulation requires that pharmacies receive only serialized products. Health systems are currently preparing for this serialization requirement while seizing the opportunity to transform their supply chains and improve patient care.

Join us for this on-demand webinar featuring Joe Maki, Senior Director of Pharmacy Business Operations at Novant Health, who explains how Novant Health is leveraging DSCSA compliance solutions to improve his pharmacy's supply chain operations. During the webinar, we also discuss how serialization can lead to supply chain improvements that have a direct impact on patient care such as:

- Improving recall management processes
- Reducing the impact of drug shortages
- Achieving end-to-end inventory visibility
- Opening new lines of direct communication with manufacturer

Watch this on-demand webinar today to learn how your organization can take advantage of the upcoming regulations and transform the pharmacy supply chain to improve patient care.
