# Introducing Serialized Product Intelligence: Establish Proactive Supply Chain Monitoring and Self-Service Analytics

What do you need to do to achieve serialized operations excellence? In this clip from our **“Introducing Serialized Product Intelligence On-Demand Webinar,”** TraceLink’s Bharath Sundararaman reveals what serialized operations and supply chain leaders say are the biggest challenges to operational excellence goals. He also discusses the capabilities you’ll need to get back to business as usual and begin focusing on higher-value initiatives.

## **What is Serialized Product Intelligence?**

Serialized Product Intelligence is a new self-service troubleshooting and analytics tool that enables you to proactively monitor your serialized drug supply chain, conduct root-cause analysis of serialization process exceptions, and identify compliance problems early, before they lead to costly disruptions. In this webinar clip, Sundararaman describes the key capabilities of Serialized Product Intelligence.
