Go-Live: Watching the First Serialized Product Scan for PAR Pharmaceutical

Anyone that conducts business within the pharma supply chain can tell you serialization is difficult, requiring plenty of logistical management, collaboration, and hard work. As of December 12, the team at PAR Pharmaceutical can also tell you what a successful serialized workflow looks and feels like – that’s when their first end-to-end serialized packaging line went live. Considering the challenges involved, this is an achievement worth noting.

The PAR pouch line started producing serialized/aggregated product with serial numbers, as planned. The first batch was completed successfully and the second serialized batch went into production without a hitch.

And this bit of company history was captured on video.

EPCIS Connection Changes post Go-Live

Lauren Catalano – Technical Services Manager

Business Challenge & Solution

Changes to established EPCIS connections is becoming more prevalent, especially for companies like Sharp functioning in the CMO/CPO space. Technical complexities related to pathway connection changes, present the added challenge of reducing the impact to daily production activities. Allowing a smooth and unified transition to the EPCIS of choice, while working within the boundaries of business constraints is key.

Master Product Data Strategy for EU-FMD implementation: the key of success in serialization

Author(s): Cristina Bonache (Corporate G&S), Luis Gallardo (P&D/Corporate G&S), and Blanca Sánchez (Global R&D)

Key Challenge & Solution

Founded in 1958, Ferrer is a privately held international pharmaceutical manufacturer in Barcelona. It is active throughout the EU with more than 10 international subsidiaries. Product is more than 100 countries with 100+ affiliates. Ferrer is active in the pharmaceutical field, the chemical sector, key areas for contributing to people's health and well-being.

By 2010, Ferrer's management of master data is critical to the success of the company. The key challenge is to ensure that the master data is accurate, consistent, and up-to-date across all subsidiaries and the global master data strategy is implemented in a timely manner.

As a key priority of the company, master data has been successfully implemented through multiple systems, both legacy and modern, across the company. The master data strategy is implemented in a timely manner, and the master data is accurate, consistent, and up-to-date across all subsidiaries and the global master data strategy is implemented in a timely manner.

Key Activities and Resources
