Anyone that conducts business within the pharma supply chain can tell you serialization is difficult, requiring plenty of logistical management, collaboration, and hard work. As of December 12, the team at PAR Pharmaceutical can also tell you what a successful serialized workflow looks and feels like – that's when their first end-to-end serialized packaging line went live. Considering the challenges involved, this is an achievement worth noting.

The PAR pouch line started producing serialized/aggregated product with serial numbers, as planned. The first batch was completed successfully and the second serialized batch went into production without a hitch.

And this bit of company history was captured on video.
