Shortages? Late Shipments? Discover a Faster Way to Resolve Supply Chain Issues

Key Takeaways

- Poor visibility and unstructured processes may be limiting your ability to resolve supply chain issues quickly and effectively.
- Real-time visibility and workflow-driven issue management processes can help you improve OTIF, reduce COGS, and resolve supply chain issues up to 65% faster.

Why does it take supply chain teams so long to resolve issues like material shortages, late deliveries, product quality problems, and sudden shifts in demand? And what will it take to resolve supply chain issues faster and more effectively? TraceLink Senior Director of Industry & Community, Allan Bowyer, explains in this brief video.
