Accelerate Supply Chain Digitization with OPUS Solution Designer

To avoid disruption and achieve success in today's chaotic environment, today's manufacturing supply chain leaders must embrace Industry 4.0 transformation and rapidly evolve their internally-focussed infrastructure into an externally-connected, responsive, and highly efficient digital supply chain network ecosystem.

TraceLink OPUS Solution Designer—a powerful low-code/no-code development solution that enables business users to easily customize multienterprise applications—is the key to accelerating the Industry 4.0 transformation process. Read our new eBook and you will learn how OPUS Solution Designer:

- Enables the customization of user experience, workflow, business object, roles, policies and permissions.
- Supports "citizen developers," who are capable business users leading or highly engaged in the digitalization of supply chain processes.
- Improves partner engagement by enabling organizations to customize user experiences to the unique needs of supply chain partner processes.
- Helps companies with rapid scaling, updating, and management of solutions across partners and networks.

Learn how OPUS Solution Designer helps you unlock the potential of Industry 4.0.
