Rapid Exception Resolution: The Key to Enhancing Integrated Supply Planning and Execution for Supply Chain Leaders

On-Demand Webinar
Duration: May 17, 2022 - May 17, 2022

Exceptions like material shortages, late deliveries, and quality problems can easily escalate into full-scale disruptions if not rapidly resolved. The result is a direct and negative impact on important KPIs like order fill rates, cash-to-cash cycle times, and OTIF delivery performance.

To be successful, supply chain leaders must empower planning teams to resolve supply plan exceptions faster with real-time supply chain visibility and workflow-driven supplier collaboration. Watch this on-demand webinar to learn:

- How to reduce order cycle times and improve fill rates by enabling planners to resolve supply plan exceptions up to 65% faster.
- How to speed up cash-to-cash cycle times and improve schedule attainment by eliminating up to 50% of recurring plan exceptions.

You'll also see how **Supply Chain Work Management**—the newest Industry 4.0 solution from TraceLink—connects planning teams with suppliers in real-time so they can collaborate more efficiently, resolve exceptions faster, and mitigate

disruption.

Featured Speakers:

- Tereance R. Puryear, Solutions Consultant, TraceLink
- Andy Curtis, Business Manager, Agile Process Teams, TraceLink
