

Uzbekistan Compliance Requirements and TraceLink Solution Overview

A complete overview of what you need to achieve compliance.

The Uzbekistan Cabinet of Ministers Decree 149 mandates the design, development, and deployment of a digital marking system for products across the life sciences industry. The end goal is to:

- Prevent illegitimate products (including medicines) from entering Uzbekistan.
- Ensure the quality of medicines and medical supplies distributed across the country.
- Track the flow of medicines, including expenditures, supply levels, and demand.

There are many deadlines and milestones for implementing all the capabilities required for compliance. It’s a lot for MAHs to manage. Are you ready?

Our latest infographic gets you up to speed with an overview of the tentative compliance dates and requirements. Plus, you’ll see how to simplify your compliance journey with the purpose-built TraceLink Uzbekistan Compliance solution.
