DSCSA Compliance for Wholesale Distributors Solution Brief

Integrate Once, Interoperate with All Suppliers and Customers to Achieve Item-Level Traceability Compliance and Improve Operational Efficiency.

In November 2023, item-level traceability under DSCSA will introduce significant regulatory compliance challenges and operational complexity for wholesale distributors. These challenges include a move to item-level traceability, a requirement to exchange serialized Transaction Information (TI) and Transaction Statements (TS) with customers and suppliers for each unit sold, and an expansion of the Verification Router Service model. Will your organization be ready in time?

The TraceLink DSCSA 2023 Compliance for Wholesale Distributors solution suite enables wholesale distributors to receive and send serialized TI and TS and securely exchange DSCSA traceability data via EPCIS with drug manufacturers, health system dispensers, and retail pharmacies through a single digital connection to the 290,000+ member TraceLink OPUS network.

Warehouse operations are simplified with scanning of aggregate barcodes and integration with warehouse management systems, enabling serialized shipments to be received with a single scan. Wholesale distributors can also verify product

identifiers to support saleable returns and suspect product investigations.

Download our “**DSCSA 2023 Compliance for Wholesale Distributors**” solution brief to learn more and see how TraceLink enables wholesale distributors to:

- Load GTIN and pack-level attributes for dispensers through a single network integration.
- Receive and send serialized TI and TS at scale.
- Facilitate both direct and indirect trade partner requests for product identifier verification.

And that's just the beginning! Learn what it takes for wholesale distributors to achieve and maintain compliance with complex DSCSA mandates ahead of the 2023 deadline. Get the solution brief today.
