DSCSA 2023 Compliance for Retail Pharmacies Solution Brief

Integrate once, interoperate with all suppliers to achieve item-level traceability compliance and improve operational efficiency.

Under DSCSA 2023, retail pharmacies will be responsible for meeting enhanced FDA verification and traceability requirements. To do so, they'll need to be able to securely receive Transaction Information (TI) and Transaction Statement (TS) data for every item they receive.

Backed by a decade of track-and-trace solution design, TraceLink DSCSA 2023 Compliance for Retail Pharmacies is purpose built to simplify and streamline compliant data exchange. **Download this solution brief** to see how our network

approach enables you to receive item-level EPCIS data for every item you sell and verify products as needed, even without a direct link to the manufacturer.

DSCSA 2023 Compliance for Retail Pharmacies enables you to:

- Ensure each unit of medicine you receive has the legally required DSCSA information.
- Handle the exploding volume of transactions associated with serialized data exchange.
- Integrate with upstream partners to streamline verification, exception management, and more.

Get the solution brief today and see how you can achieve DSCSA compliance while improving operational efficiency.
