Track and Trace for Phase 3 Pharmaceutical Manufacturers

Manage all global track-and-trace mandates with a proven serialization solution suite used by more than 80% of pharmaceutical companies launching their first product to market.

Around the world, a surging number of serialization and track-and-trace compliance requirements have introduced a new hurdle that Phase 3 companies must overcome to successfully bring their products to the commercial market. Any disruption or delay in implementing a scalable track-and-trace compliance program can lead to a significant lengthening of the commercialization cycle, a loss of potential revenue, and a loss of first-mover advantage.

The **TraceLink Track and Trace for Phase 3 Pharmaceutical Manufacturers** solution suite provides serialization and global track-and-trace on a powerful supply chain network digitalization platform that connects Phase 3 companies with all contract development and manufacturing organizations (CDMOs), third-party logistics (3PL) providers, specialty pharmacies, and other downstream partners across the end-to-end supply chain. **Read our new solution brief** to see how TraceLink Track and Trace for Phase 3 Pharmaceutical Manufacturers delivers important benefits, including:

- **Ensure Supply:** TraceLink is the serialization and track-and-trace leader with a track record of quickly and reliably integrating CDMOs around the globe with zero downtime and 24x7 support to ensure your products reach the market on-time, in-full (OTIF).
- **Continuous Compliance:** Automatic updates support new and evolving global regulations and guidelines, technical standards, and workflows.
- **Integrate Once, Interoperate with Everyone™:** The TraceLink network platform eliminates costly point-to-point integrations by enabling all customers and trading partners to integrate only once and then interoperate with anyone else on the network with point-and-click configuration.
- **Scalability:** As your company's product volumes grow, the TraceLink native cloud architecture and global services capabilities will grow with you.

You will also see the results and benefits achieved by one real-world Phase 3 pharmaceutical manufacturer that chose TraceLink for its serialization and track-and-trace needs.
