A Faster, Better Way for Pharmacies to Receive and Reconcile Serialized Product

Under the U.S. Drug Supply Chain Security Act (DSCSA), health systems and retail pharmacies have until November 27, 2023 to ensure that each unit of medicine received is accompanied by item-level traceability data.

The easiest and most efficient way to ensure the physical product has the corresponding compliance data is to leverage the **TraceLink Smart Inventory Tracker** mobile solution. Smart Inventory Tracker enables serialized receiving and shipping at the door and provides full synchronization with pharmacy inventory or warehouse management systems.

Watch this quick video from our **DSCSA Webinar Series**, featuring Christine Kearns, Principal Solutions Consultant at TraceLink, to learn how Smart Inventory Tracker delivers a faster, better, and future-proof way to receive and reconcile serialized products and improve pharmacy operations.

Don’t let compliance-related stockouts impact your bottom line and patient outcomes. Watch the video now and see how Smart Inventory Tracker helps you ensure continuous compliance with DSCSA.
