

Improve Supply Chain Visibility and Collaboration! Join the Multienterprise Information Network Tower (MINT) Customer Launch Program

Read our new strategy brief to learn more.

Pharmaceutical supply chain disruptions, material shortages, and demand volatility are at an all-time high—and the need for improved visibility and real-time collaboration between supply chain partners has never been greater. But the level of interoperability required to power business systems with real-time information and improve supply chain decision-making has been out of reach for most companies due to cost and technical limitations—until now.

The newest groundbreaking solution from TraceLink—**Multienterprise Information Network Tower (MINT)**—improves visibility and collaboration between supply chain partners by enabling the real-time exchange of business information, including forecasts, purchase orders, invoices, advanced shipment notices, and a virtually unlimited number of additional business transaction types. Powered by the TraceLink Integrate Once, Interoperate with Everyone™ capability, companies and their supply chain partners need only a single integration to the OPUS network to begin exchanging business information. To power end-to-end supply chain digitalization, MINT:

© TraceLink Inc. 2009 - 2025 All Rights Reserved

- Uses TraceLink's proven methodology for building business networks, onboarding partners, and exchanging data.
- Is 10-100 times faster to implement and less expensive than current data exchange methods, including EDI or P2P integration.
- Connects to any business system, regardless of version or information exchange protocol.

Ready to learn more? TraceLink customers are invited to be the first to take advantage of this powerful supply chain digitalization capability by joining the MINT Customer Launch Program. Initially, TraceLink is inviting pharmaceutical manufacturers and their CMO partners that want to modernize the procure-to-pay process, including the exchange of purchase orders, acknowledgements, shipment notices, and invoices to join the program.
