Is Your VRS Vendor Exiting the Market? TraceLink Offers a Risk-Free Path to DSCSA Compliance!

If a recent acquisition has you concerned about your verification solution, TraceLink can help you meet DSCSA requirements ahead of the Nov. 27 deadline without disruption.

The U.S. Drug Supply Chain Security Act (DSCSA) includes product verification requirements for responding to verification requests for saleable returns and suspect product investigations. However, a recent acquisition in the VRS provider space has left many pharmaceutical manufacturers concerned about the viability of their current verification solution.

For manufacturers caught in the turmoil, TraceLink offers the fastest, risk-free path to meet DSCSA verification requirements ahead of the Nov. 27 deadline. The **DSCSA compliance** requirements are complex, but TraceLink makes it easy to meet all the requirements. Download this strategy brief to see how TraceLink enables manufacturers to:

- Meet DSCSA verification requirements for saleable returns processes, product investigations, and more ahead of the deadline with a proven, scalable solution.
- Gain product verification and master data sharing capabilities without

disrupting existing Level 4 serialization systems or customer integrations.

- Exchange EPCIS data to meet compliance requirements through a single connection to the TraceLink network—no point-to-point trade partner integrations required.

Download the strategy brief today and get started on the path to DSCSA compliance.
