DSCSA Drop Shipments: How TraceLink Makes Compliance Easy for Pharmacies

.talkSales, .scheduleDemo{cursor:pointer;} .coh-style-widget-form-close-title {font-size:1.8rem;}

For pharmacies, receiving and managing drop shipments from manufacturers is a daily challenge. Time is running out to ensure that your pharmacy operations have the necessary capabilities to receive U.S. Drug Supply Chain Security Act (DSCSA) compliance data to manage these critical shipments. The final November 27, 2023 deadline adds important new requirements for your business.

DSCSA requires pharmacies to receive serialized T2 product data in the industry-standard EPCIS format for each shipment received from your suppliers, including drop shipments received directly from pharma manufacturers. Do you know if your current DSCSA solution is capable of this without slowing down pharmacy operations?

The good news is that TraceLink's proven DSCSA Compliance Solution for Pharmacies enables you to receive drop shipments with the required serialized T2 data as part of the normal receiving process. With TraceLink, you can receive the EPCIS data along with the Rx products received from direct suppliers with no additional process steps. Watch this quick video clip to see how TraceLink makes
