Streamline the Product Recall Process with TraceLink Digital Recalls

Increase focus on patient safety by managing drug recalls with greater speed and efficiency.

For health systems and retail pharmacies, **managing product recalls** is a manual and time-consuming process. A never-ending backlog of recalls and the need to sift through notifications to identify relevant recalls make it difficult to retrieve recalled products from inventory with speed and efficiency. Compounding these challenges are tight deadlines for contacting patients and vulnerability to notification delays.

To overcome these challenges and increase patient safety, health systems and retail pharmacies need a digital solution that leverages a proven network and enables faster and more effective product recall notification, identification, and management.

TraceLink Digital Recalls is a collaborative, end-to-end recall workflow orchestration solution that provides real-time recall notifications sourced directly

from the U.S. Food and Drug Administration (FDA) in a fully digital, easy-to-understand format that enables an immediate, coordinated response across all pharmacy locations while reducing the risk of recalled products reaching patients.

Read our new solution brief to learn how Digital Recalls streamlines and coordinates communication between pharmacy leadership and individual dispensing sites while enabling real-time monitoring of recall response actions and improved reporting and giving you greater control over the entire product recall process. Some examples of key benefits of Digital Recalls include:

- **Protect Patients:** Increase patient safety through a fully digitalized notification and internal orchestration process across the pharmacy, which helps prevent recalled products from reaching patients.
- **Reduce Recall Spend:** Targeted distribution of recall notices enables you to send acknowledgements back to manufacturers at a fraction of the cost of competing recall services.
- **Boost Operational Efficiency:** Reduce time spent coordinating administrative recall tasks by 40%, and reduce the number of shelf walks necessary to retrieve recalled products by 47% with targeted recalls.

But the benefits don't stop there. **Download our Digital Recalls solution brief** now to discover how TraceLink can save your pharmacy staff and pharmacy technicians valuable time. Then **contract TraceLink to schedule a meeting** and get started with Digital Recalls today.
