FAQ

TRACELINK UNIVERSITY

Quick reference for network and app names

The networks in the network composer and the apps in the main menu display in alphabetical order. If a network name appears more than once in the quick reference table, that means all apps with that network name listed are accessed from that network.

Company names

All Partner network names are prefixed by the name of the company that owns the network (e.g. Kendall Pharma - Serialized Operations Manager).

Classic TTS apps

All classic TTS apps are available through the main menu. Some networks include both OPUS Web UI screens *and* classic TTS Web UI screens.
