Forecast Plan Response (IDoc)

Forecasting APIs allow companies to exchange data about anticipated product demand and supply availability with upstream and downstream supply chain Partners without giving these Partners access to their serialization system of record. These Forecasts can be used by buyers to inform their Partners about anticipated demand for specific products and quantities they expect to need in an upcoming amount of time and by suppliers to inform their Partners about their ability to meet the Partners' anticipated demand for specific products and quantities.

The Forecast Plan IDoc message is sent from the supplier to the buyer and communicates the supplier's ability to meet the buyers' anticipated product quantity needs for an upcoming period of time.

Contact your TraceLink Services representative for more information about integrating with this message.

- **Message Type:** MPC_FORECAST_PLAN_RESPONSE (Forecast Plan Response)
- **IDoc Format:** DELFOR.DELFOR02
- **Transform Name:**
B2B_IDoc_DELFOR_DELFOR02_ForecastPlanResponse_IB_V2
- **Direction:** Inbound to TraceLink
