Purchase orders

Owners and their Partners search for and view, and create purchase orders (POs) that are exchanged with Partners asynchronously. Viewing the details of a purchase order that was sent or received asynchronously in the Web UI makes key information more consumable for users and enables companies to access order information (e.g. the quantity for each line item in an order) in TraceLink without having to search through the actual B2B message. Purchase orders allow buyers to communicate a request and commitment from the buyer to pay the seller for the sale of specific products or services to be delivered in the future. For example, a buyer who needs to review the latest send a purchase order sent to a supplier can use the Web UI to show the most recently modified purchased orders sent create a new purchase order and send it to the supplier and quickly find the one to review.

Create and submit purchase orders

Perform this task to create and submit new purchase orders. Additionally, customers can begin work on a purchase order and save it for completion at a later time.

3. Select

   Manufacturing - Customer

   from the left menu.
   Partners must have the correct roles assigned if using the Owner's instance of Multienterprise Information Network Tower.

4. Select

   Purchase Orders

   .
5. Select the Filter Filter button to find the purchase order in Draft state.
6. Select the PO Number link in the results table.
7. Select the Edit Edit button.
8. In the Transaction Information section, select Submitted from the Process Status drop drown.
9. Confirm the purchase order details and select the Edit icon associated with that line item to modify the fields if required.
10. Select the Move To button at the top of the screen.

    The submit status indicator circle is filled in with green to indicate the desired action upon selecting save.
11. Select the Save button.

    The purchase order is submitted.

Tips

- Select the purchase order number row and then select the Delete icon on the top of the Search Purchase Orders screen, to delete a purchase order in the draft state.

A deleted transaction cannot be retrieved.

Search and view purchase orders

Perform this task to search for and view the details of the purchase orders sent or received by suppliers or customers. Viewing the details of a prices sales catalogs enables suppliers or customers to quickly access order information (e.g. the quantity for each line item in an order) in TraceLink without having to search through the actual B2B message.

Search for and view purchase orders

1. Select a [MPL Network] from the Network drop-down in the header.
2. Select a Team (e.g. your entire company or a Link to a specific Partner or internal location) in the header.
3. Select Manufacturing - Customer or Manufacturing - Supplier from the left menu.
   Partners must have the correct roles assigned if using the Owner's instance of Multienterprise Information Network Tower.
4. Select

   Purchase Orders

   .
5. Select the Filter button.
6. In the Filters panel, fill in one or more of the following fields to filter the results:

   a. State drop-down – The state of the purchase order:

      - Draft – The transaction is in the draft state.
      - Submit – The transaction has been created.
      - Processing – The application is getting ready to handle incoming transactions by doing some initial tasks, such as copying the files it receives.

- Processed – The application changes the standard information into a format that is easy to use and specific to your transaction.
- Preparing to Send – The application is getting ready to send out a transaction and is doing some initial tasks, like copying the necessary information for the process.
- Sending –The application sends out business transactions to the buyer or supplier.
- Sent – The transaction is successfully completed and shared with the receiving party.

b. Supplier type-ahead – Displays only if the menu item is

   Sent Purchase Orders

   . . The name of the company the purchase order was sent to.

   If the company name is not present in the Owners master data then the company’s name must be entered manually.

c. Buyer type-ahead – Displays only if the menu item is

   Received Purchase Orders

   . The name of the company the purchase order was received from. If the name of the company is not present in the Owner's master data then the company's name must be entered manually.

d. Last Modified field – The period of time in which the purchase order was last updated:
   - Today – The transaction was modified within the last few hours.
   - Yesterday – The transaction was updated within the past 24 hours.
   - Last Week – The transaction was modified in the last 7 days.
   - Last Month – The transaction was modified in the last 30 days.
   - Last 3 Months – The transaction was modified in the last 90 days.

- Last 6 Months – The transaction was modified in the last 180 days.
- Custom Range – Select a specific period of time that the transaction was modified in from the calendar.

7. Select Apply.

   A list of purchase orders displays based on the filter results.

8. Select the link for the purchase order from the results table.

   The View Purchase Orders screen displays.

9. To view all fields for each line item, select the View icon on the

   Purchase Orders

   Details screen. .

Reprocess and resubmit purchase orders

Reprocess purchase orders

After the purchase order is submitted, the user might encounter an error and the processed status will be set to Paused With Error. Use the following procedure to resolve any error messages encountered while submitting purchase orders.

1. Select a [MPL Network] from the Network drop-down in the header.
2. Select a Team (e.g. your entire company or a Link to a specific Partner or internal location) in the header.
3. Select

   Manufacturing - Customer

   from the left menu.

   Partners must have the correct roles assigned if using the Owner's instance of Multienterprise Information Network Tower.

4. Select

   Purchase Orders

   .
5. Select the Filter Filter button to find the purchase order in Processing, Processed, Preparing to Send, or Sending state.
6. Select the PO Number link in the results table.
7. View the following fields for error in the Transaction Information section:
   - Process Status - Displays the status of the submitted transaction.
   - Last Transaction Error - Displays the error message.
8. Select the Edit Edit button..
9. In the Transaction Information section, select Submitted from the Process Status drop drown.
10. Select the Save button.
    The purchase orders request is moved from Processing state to Sending state indicating that the purchase order is submitted successfully.

⚠ Do not select the Move To button, as it will cause the transaction to skip a workflow state, preventing successful delivery.

Resubmit purchase orders

If a transaction is successfully sent to a partner but an issue occurs on the partner's side (e.g. in their ERP system), the sender can avoid re-entering all the details by rolling back to a previous workflow state and resending the transaction, thus saving time and effort for both parties.

1. Select a [Customer-defined MPC Network] from the Network drop-down in the header.
2. Select a Team (e.g. your entire company or a Link to a specific Partner or

internal location) in the header.

3. Select

   Manufacturing - Customer

   from the left menu.

   Partners must have the correct roles assigned if using the Owner's instance of Multienterprise Information Network Tower.

4. Select

   Purchase Orders

   .

5. Select PO Number in Sent state.

6. Select the Edit Edit button.

   The state of the purchase order is automatically moved to Sending state.

7. Select the Move To button at the top of the screen.

   The submit status indicator circle is filled in with green to indicate the desired action upon selecting save.

8. Select the Save button.

   The purchase order is submitted.

The statues of the purchase order moves to Sent state.
