What's new in Multienterprise Information Network Tower, solution version 9.0

Explore what's new in the Multienterprise Information Network Tower, solution version 9.0 release.

Release information

This document describes the TraceLink capabilities included in the Multienterprise Information Network Tower, solution version 9.0 release, which is available on Validation on 25 Apr 2024 and Production on 9 May 2024.

The following solutions are impacted by this release and will be updated to the version listed:

- Multienterprise Information Network Tower, solution version 9.0

Apps that support this solution version:

- Multienterprise Process Connect, version 2024.4

The features below are in order of functional relevance (i.e. the typical order in which a user executes a function or task).

 These release notes are subject to change based on the successful deployment of the release. In the event of changes, the release notes and any related documentation will be updated within one week of release deployment. Deployment completion can be confirmed in the TraceLink Release Notice email.

Revisions

Date	Revision	Description
11 Apr 2024	01	Initial version.
25 Apr 2024	02	The following updates have been made since the previous revision was distributed: <ul style="list-style-type: none">• 1 issue is added to Resolved issues.• 0 issues are added to Known issues.

Features

Multienterprise Information Network Tower, solution version 9.0.0

The following new or updated functionality is included in this release.

Search for Inventory Update B2B Messages in the Web UI

Companies that own Multienterprise Process Connect and their Partners can view and search for inventory update messages that are exchanged with Partners. Searching for and viewing Inventory Update Message Types enables users to monitor the status of their messages, confirm that they have been sent or delivered, and troubleshoot message issues by viewing any errors or downloading the message input, output, and canonical files. Additionally, Application Administrators can manually reprocess outbound messages from TraceLink that failed to deliver.

Impact analysis

- Interface options:
 - Web UI
- Business segment impacts:

- All business segments for both Owners and Partners

Resolved issues

Multienterprise Information Network Tower, solution version 9.0.0

The following issues are resolved in this release. The prefixes are for internal TraceLink tracking purposes and do not mean anything to customers.

ID	Interface	Issue Description
36716: Supplier Filter for Purchase Orders and Purchase Order Acknowledgment Returns Inaccurate Results	Web UI	When users filter list items by Supplier for purchase orders and purchase order acknowledgments, the results displayed are not relevant to the selected supplier. This issue has been resolved.

Known issues

Multienterprise Information Network Tower, solution version 9.0.0

There are no known issues in this release.
