UI Features

The following new or updated functionality will be included in this release.

Link Multiple Partners via CSV Import in the Opus Web UI

This feature allows System Administrators and Application Administrators to a CSV file to expedite the process of linking to hundreds of Partners in a single action. Prior to this release, System Administrators and Application Administrator

had to manually link to a single Partner.

Impact analysis

- Interface options:
 - UI
- Business segment impacts:
 - All business segments for Owners.

Enhance the Ability to Administer Networks

This feature includes enhancements to make it easier for System Administrators and Application Administrators to administer networks in the Opus Platform UI.

In the Networks side menu item, System Administrators and Application Administrators can now (e.g. update a solution used by a network) on the Opus Networks tab.

In the Links side menu item, the following new functionality is available for managing Links:

- On the Opus Links tab,
 - Opus Link Owners can manage all users and roles on an Opus Link.
 - Owners of Opus Links can manage their Partner users on an Opus Link.
When a System Administrator or Application Administrator links to a Partner, TraceLink sends an email to the linked Partner company.
- On the Classic Links tab,
 - Classic Link Owners can manage all users and roles on a classic Link.
 - Classic Link Partners can manage their Partner users on a classic Link.
When a System Administrator or Application Administrator links to a Partner, TraceLink sends an email to the linked Partner company.

In the Users side menu item, the following new functionality is available for managing users:

- On the Users in Opus Networks tab,
 - System Administrators and Application Administrators can the roles of a user in the Opus Networks tab.
 - Owners can all users in the Opus Network.
 - Partners can only their users.
- On the Users in Classic Networks tab,
 - System Administrators and Application Administrators can the roles of a user in the Classic Networks tab.
 - Owners can all users in the classic Network.
 - Partners can only their users.

Impact analysis

- Interface options:
 - Web UI
- Business segment impacts:
 - All business segments for Owners.

System Features

There is no new or updated system functionality included in this release.

Resolved issues

Administration, version 4.1.0

The following issues are resolved in this release. The prefixes are for internal TraceLink tracking purposes and do not mean anything to customers.

ID	Interface	Issue Description
36283: Cannot Add External User to Classic Network	Web UI	The component to add an external user was not loading correctly so it was not possible to add an external user. This issue is resolved.

Administration, version 4.0.0

The following issues are resolved in this release. The prefixes are for internal TraceLink tracking purposes and do not mean anything to customers.

ID	Interface	Issue Description
34732: Network Field is Required when Assigning a User with the System Administrator Role	Web UI	The Assign User to Administrator Role overlay requires the Network field to be populated in order to assign someone with a System Administrator role. The UI must be updated to make this field optional. This issue is resolved.
35532: Users in the Opus Network encounter an Unexpected Error While Viewing Filtered Data	Web UI	When a user filters "Users in Opus Networks" Network by team and tries to navigate to the next page or increases the number of rows per page, an error displays saying "No data available" instead of showing correct data. This issue is resolved.

Known issues

Administration, version 4.1.0

There are no known issues in this release.

Administration, version 4.0.0

The following known issues are included in this release and will be fixed in a future patch release. The prefixes are for internal TraceLink tracking purposes and do not mean anything to customers.

ID	Interface	Issue Description
36039: Custom Solution Name Missing when Performing an Edit Network Operation in Opus Networks	Web UI	When editing a network in the Opus Network UI, it is expected that the Custom Solution name is displayed.
