Identifier APIs

IT system administrators use these APIs to add, edit, or remove identifiers in company, company location, Partner, or Partner location master data to track and leverage information necessary to complete operations needed for serialized production, shipping and receiving, and regulatory compliance. These APIs only impact new identifiers, IT system administrators can edit identifiers without needing to fill out the entire set of data for the associated record.

Add Identifiers to Master Data

IT system administrators use this API to add identifiers to company, company location, Partner, or Partner location master data.

Add Identifiers to Master Data request

Element	Туре	Description		
header	-	Required. The request header.		
headerVersion	Integer	Required. The version identifier for the request. Valid value is ${\bf 1}$.		
eventName	String	Required. The fully qualified name of the request event. Valid value is masterdata-manager:add-identifier- response:v1.		
ownerld	String	Required. The identifier for the Owner company associated with the request.		
appName	String	Required. The application that owns the event. Valid value is masterdata-manager.		
dataspace	String	Required. The dataspace within the environment where the request is being made. Valid value for the Production and Validation environments is default.		
payload	-	Required. The request body.		
masterDataObjectId	String	Required. The master data identifier for the master data record that the new identifier is being added to.		
masterDataObjectType	Enumeration	Required. Specifies the type of identifier that is being added to the master data record. Valid values: • COMPANY - The identifier for the company. • COMPANY_LOCATION - The identifier for the company location. • PARTINER - The identifier for the Partner. • PARTINER - The identifier for the Partner location.		
identifiers	Array	Required. The identifier for company, company location, Partner, or Partner location.		
masterDataIdentifierTypeDef	Object	Required. The information for the identifiers to add.		

Element	Туре	Description Required. The type of the identifier.
Element	Туре	Required. The type of the identifier. Valid values • AR_CUT - 11-character Argentina Tax ID. Format is 00-0000000-0 (e.g. 33-56899856-8). Cannot be set as the Primary Identifier. • AM_TIN - 8-character Armenia Taxpayer Identification Number (e.g. 53663456). Cannot be set as the Primary Identifier. • BR_CKES - Brazil National Registry of Health Facilities Number (e.g. 3868249). • BR_CKPJ - 14-character Brazil Tax/Legal Entity ID. Format is 00.000.000/0001-00 (e.g. 71.116.165/0001-71). • BR_CPF - 11-character Brazil Individual Taxpayer Registration Number. Format is 000.000.000-00 (e.g. 605.085.153-00). The first 8 digits identify the company, the next 4 digits identify the branch or subsidiary ("0001" designates the headquarters), and the last 2 are check
identifierType	String	digits. • BR_PROF_REG - Brazil Professional Registration Number (e.g. CRODFCD9952). • BY_TIN - 9-character Belarus Taxpayer Identification Number (e.g. 004893223). Cannot be set as the Primary Identifier. • CN_CHINA_ID - Alphanumeric China identifier (e.g. 352)685548N). • CN_FOREIGN_MFR - China Foreign MAH ID (e.g. 0678645). • CN_FOREIGN_MFR - China Foreign Manufacturer ID (e.g. 665555D). • CN_USCID - China Unified Social Credit Identifier (e.g. 9771221453). • COMPANYID - Alphanumeric internal company identifier (e.g. KENDALL). • COMPANYID - Alphanumeric internal location, plant, or site identifier (e.g. 465MEMPHIS). • DE_IFA_REG_NUM - 6-character Informationsstelle für Arzneispezialitäten (IFA) Registration Number (e.g. 548726). Cannot be set as the Primary Identifier. • DEA - 9-character US Drug Enforcement Agency Number (e.g. 92787851). • DUNS - 9-character Dunn and Bradstreet Number (e.g. 927879661). • DUNS - 9-character Dunn and Bradstreet Number (e.g. 927799661). • DUNS - 9-character Global Location Number (e.g. 8856277). • CLO - 6- to 12-character GSI Global Company Prefix (e.g. 8856277). • CLO - 13-character Global Location Number (e.g. 8856277). • CLO - 14- 13-character Global Location Number (e.g. 8856277). • CLO - 15- to 19-character Global Location Number (e.g. 427564574). • IN COMPANY ID - India Company ID (e.g. 42766470). • ID BPOM_FACTLITYID - Indonesia Facility ID (e.g. 42766470). • IN _ BPOM_FACTLITYID - Indonesia Facility ID (e.g. 427664730). • IN _ COMPANY ID - India Location ID (e.g. 65874532). • IN _ IMR - India Merchant Exporter Code (e.g. 025541222). • IN _ IMR - India Merchant Exporter Code (e.g. 055876213). • IN _ IMR - India Merchant Exporter Code (e.g. 055876213). • IN _ IMR - India Merchant Exporter Code (e.g. 055876213). • IN _ IMR - India Merchant Exporter Code (e.g. 65874532). • IN _ IMR - India Merchant Exporter Code (e.g. 055876232). • IN _ IMR - India Merchant Exporter Code (e.g. 056874532). • IN _ IMR - India Merchant Exporter Code (e.g. 056874532)
		one of the following identifier types can be assigned to an entity; RU - INN Local, RU - IN Foreign, and RU - INN Individual. • RU _INN_INDIV - 12-character Russia Individual Taxpaye identification Number (e.g. 123456789001). Cannot be set as the Primary Identifier. Only one of the following identifier types can be assigned to an entity; RU - INN Local, RU - IN Foreign, and RU - INN Individual. • RU _INN_KPP _TAX_CODE - 9-character Russia KPP Registration Code (e.g. 771301001). Cannot be set as the Primary Identifier. • RU _INN_LOCAL_ENTITY - 10-character Russia Local Business Taxpayer Identification Number (e.g. 7728640746). Cannot be set as the Primary Identifier. • RU _INN_LOCAL_ENTITY - 10-character Russia Local Business Taxpayer Identification Number (e.g. 7728640746). Cannot be set as the Primary Identifier. Only one of the following identifier types can be assigned to an entity; RU - INN Local, RU - IN Foreign, and RU - INN Individual. • SGLN - 15-character SGLN format representation of Globa Location Number: • Format for company entities is [CompanyPrefix]. [LocationRef]. On I (CompanyPrefix). [LocationRef] is not included, the first two segments contain only digits separated by the dot, and must be 13 characters in total. If the LocationRef is not included, then the first segment must be 12 digits, followed by two dot seperators. The third segment should always be the digit 0. For example, 5398854519280 or urn:epc:dis-gin:0614141.12345.0. • Format for location entities is [CompanyPrefix]. [LocationRef]. [sub-location identifier] or [CompanyPrefix]. [LocationRef]. [sub-location identifier]. The LocationRef is not included, then the first segment must be 12 digits, followed by two dot seperators. The third segment is always alphanumeric and can be any length, with at least one character in it preceded by the dot sep

	Element		Туре	Description
П	Τ	identifierValue	String	Required. The identifier value.
		isPrimary	Boolean	Required. Indicates whether the given company, company location, Partner, or Partner identifier is the primary identifier. One only identifier can be set as the primary identifier. Not all identifiers are eligible to be set as the primary.

Add Identifiers to Master Data response

	Element	Туре	Description
header		-	Required. The response header.
	headerVersion	Integer	Required. The version identifier for the response. Valid value is 1.
	eventName	String	Required. The fully qualified name of the response event. Valid value is masterdata-manager:add-identifier-response:v1.
	ownerld	String	Required. The identifier for the Owner company associated with the request.

Element	Туре	Description
isErr	Boolean	Required. Indicates whether the request was successful. Valid values: • true - The request was successful. • false - The request was not successful. The errCode field provides error information for troubleshooting.
errCode	String	Required. The status code of the request. 200_0K indicates that the request was successful.
errMsg	String	Conditionally required if the call is unsuccessful. The message associated with the error code.
licensePlate	String	Required. The unique identifier for the request and response instance.
exceptionName	String	The exception returned for the request, if applicable. Valid values: • BadRequestException - The request is missing fields or has invalid data. • NotFoundException - The requested information is not available.
payload	-	Required. The payload containing the response body. If the call is unsuccessful, payload is null.
id	String	Required. The GUID of the updated master data record.

Edit Identifiers in Master Data

IT system administrators use this API to edit identifiers in company, company location, Partner, or Partner location master data.

Edit Identifiers in Master Data request

Element	Туре	Description
header	-	Required. The request header.
headerVersion	Integer	Required. The version identifier for the request. Valid value is 1.
eventName	String	Required. The fully qualified name of the request event. Valid value is masterdata-manager:edit-identifier:v1.
ownerld	String	Required. The identifier for the Owner company associated with the request.
appName	String	Required. The application that owns the event. Valid value is masterdata-manager.
dataspace	String	Required. The dataspace within the environment where the request is being made. Valid value for the Production and Validation environments is default.
payload	-	Required. The request body.
masterDataObjectId	String	Required. The master data identifier for the master data record that the new identifier is being added to.
masterDataObjectType	Enumeration	Required. Specifies the type of identifier that is being edited within the master data record. Valid values: • COMPANY • COMPANY_LOCATION • PARTNER • PARTNER_LOCATION
oldIdentifier	Object	Required. The information for the current identifier.

Element	Туре	Description
		Required. The type of the identifier. Valid values
		• AR_CUIT - 11-character Argentina Tax ID. Format is 00-0000000-0 (e.g. 33-56899856-8). Cannot be
		set as the Primary Identifier. • AM_TIN – 8-character Armenia Taxpayer Identification Number (e.g. 53663456). Cannot be set as the
		Primary Identifier. • BR CNES - Brazil National Registry of Health Facilities Number (e.g. 3868249).
		• BR_CNPJ - 14-character Brazil Tax/Legal Entity ID. Format is 00.000.000/0001-00 (e.g.
		71.116.165/0001-71). • BR_CPF - 11-character Brazil Individual Taxpayer Registration Number. Format is 000.000.000-00 (e.g. 605.085.153-00). The first 8 digits identify the company, the next 4 digits identify the branch or
		subsidiary ("0001" designates the headquarters), and the last 2 are check digits. • BR_PROF_REG - Brazil Professional Registration Number (e.g. CRODFCD9952). • BY TIN - 9-character Belarus Taxpayer Identification Number (e.g. 004893223). Cannot be set as the
		Primary Identifier. • CN CHINA ID – Alphanumeric China identifier (e.g. 352 685B548N).
		• CN_FOREIGN_MAH - China Foreign MAH ID (e.g. 0678645).
		CN_FOREIGN_MFR - China Foreign Manufacturer ID (e.g. 665S55D). CN_USCID - China Unified Social Credit Identifier (e.g. 9771221453).
		COMPANYID - Alphanumeric internal company identifier (e.g. KENDALL). COMPANYSITEID - Alphanumeric internal location, plant, or site identifier (e.g. 465MEMPHIS).
		• DE_IFA_REG_NUM - 6-character Informationsstelle für Arzneispezialitäten (IFA) Registration Number
		(e.g. 548726). Cannot be set as the Primary Identifier. • DEA – 9-character US Drug Enforcement Agency Number (e.g. F92547851).
		 DUNS - 9-character Dunn and Bradstreet Number (e.g. 82-759-6961). DUNS4 - 13-character Dunn and Bradstreet Number, which includes a 4 digit extension (e.g.
		82-759-6961-KP89).
		• GCP - 6- to 12-character GS1 Global Company Prefix (e.g. 8856277). • GLN - 13-character Global Location Number (e.g. 8856277233311). To send and receive EPCIS
		messages, companies and locations need a GLN.
		• HIN - Maximum 9-alphanumeric character Health Industry Number assigned by HIBCC (e.g. 214Z65H00).
		• ID_BPOM_FACILITYID - Indonesia Facility ID (e.g. 45764574). • IN COMPANY ID - India Company ID (e.g. 5423695784236).
		• IN_GSTN - India Goods and Services Tax ID (e.g. 55876215).
		• IN_IEC - 10-character India Importer Exporter Code (e.g. 0255411222). Cannot be set as the Primary Identifier.
		• IN_LOCATION_ID - India Location ID (e.g. 65874532).
identifierType	String	IN_MFR - India Manufacturing Code (e.g. 00552101). IN_MRCH - India Merchant Exporter Code (e.g. 601227644).
		• IN_PAN – 10-character India Permanent Account Number. The first five characters are letters, next four numbers, last character is a letter (e.g. AFZPK7190K). Cannot be set as the Primary Identifier.
		• IN_TIN - 11-character India Taxpayer Identification Number (e.g. 95684444523). Cannot be set as the Primary Identifier.
		• KG_TIN - 14-character Kyrgyzstan Taxpayer Identification Number (e.g. 56200044505998). Cannot
		be set as the Primary Identifier. • KR_BUS_REG_NUMBER - 10-character South Korea Corporate Registration Number. Format is xxx-xx-
		xxxxx (e.g. 324-84-22451). • KR PROVIDER CODE - 8-character South Korea Provider Code (e.g. 45632196).
		• KZ_BIN - 12-character Kazakhstan Business Identification Number (e.g. 220110668755). Cannot be set as the Primary Identifier.
		• RU_ACCOUNT_NUMBER - 14- to 36-character Russia Account Number (e.g. 19527400000001 or
		19406412-0001-000a-0000-000000000022). Cannot be set as the Primary Identifier. • RU INN FOREIGN ENTITY – 10-character Russia Foreign Business Taxpayer Identification Number
		(e.g. 7744000912). Cannot be set as the Primary Identifier. Only one of the following identifier types can be assigned to an entity: RU - INN Local, RU - IN Foreign, and RU - INN Individual.
		• RU_INN_INDIV - 12-character Russia Individual Taxpayer Identification Number (e.g.
		123456789001). Cannot be set as the Primary Identifier. Only one of the following identifier types can be assigned to an entity: RU - INN Local, RU - IN Foreign, and RU - INN Individual.
		• RU_INN_KPP_TAX_CODE - 9-character Russia KPP Registration Code (e.g. 771301001). Cannot be set
		as the Primary Identifier. • RU_INN_LOCAL_ENTITY - 10-character Russia Local Business Taxpayer Identification Number (e.g.
		7728640746). Cannot be set as the Primary Identifier. Only one of the following identifier types can be assigned to an entity: RU - INN Local, RU - IN Foreign, and RU - INN Individual.
		• SGLN - 15-character SGLN format representation of Global Location Number:
		 Format for company entities is [CompanyPrefix].[LocationRef].0 or [CompanyPrefix].0. The LocationRef segment is optional. If the LocationRef is included, the first two segments contain only
		digits separated by the dot, and must be 13 characters in total. If the LocationRef is not included, then the first segment must be 12 digits, followed by two dot separators. The third segment should always
		be the digit 0. For example, 5398854519280 or urn:epc:id:sgln:0614141.12345.0.
		Format for location entities is [CompanyPrefix].[LocationRef].[sub-location identifier] or [CompanyPrefix][sub-location identifier].The LocationRef segment is optional. If the LocationRef is
		included, the first two segments contain only digits separated by the dot, and must be 13 characters in
		total. If the LocationRef is not included, then the first segment must be 12 digits, followed by two dot seperators. The third segment is always alphanumeric and can be any length, with at least one
		character in it preceded by the dot separator. For example, 8856277.23331.6 or 53988545192811. • TRACELINK ID - TraceLink Identification Number (e.g. KENDALLPHARM).
		• UZ_TIN - 9-character Uzbekistan Taxpayer Identification Number (e.g. 000181244). Cannot be set as
identifierValue	String	the Primary Identifier. Required. The identifier value.
	String	nequired. The identifier value.

Element	Туре	Description
isPrimary	Boolean	Required. Indicates whether the given company, company location, Partner, or Partner identifier is the primary identifier. One only identifier can be set as the primary identifier. Not all identifiers are eligible to be set as the primary. TraceLink uses the primary identifier to identify the correct company, company location, Partner, or Partner location when the user updates the master data. Valid values: • true – The identifier is the primary identifier. • false – (default) The identifier is not the primary identifier.
newIdentifier	Object	Required. The information for the new identifier.

set as the Primary Identifier. AM_TER_8-character Ammeria Tayapyer Identification Number (e.g., 53663456), Cannot be set as the Primary Identifier. Brown Juliantifier. Edit Identifiers in Master Data response

	Element Type		Description	
h	header -		Required. The response header.	
	headerVersion	Integer	Required. The version identifier for the response. Valid value is 1.	
	eventName	String	Required. The fully qualified name of the response event. Valid value is masterdata-manager:edit-identifier:v1.	
	ownerld String isErr Boolean		Required. The identifier for the Owner company associated with the request.	
			 Required. Indicates whether the request was successful. Valid values: true - The request was successful. false - The request was not successful. The errCode field provides error information for troubleshooting. 	
	errCode String		Required. The status code of the request. 200_0K indicates that the request was successful.	
	errMsg	String	Conditionally required if the call is unsuccessful. The message associated with the error code.	
licensePlate String Required. The unique identifier for instance.		Required. The unique identifier for the request and response instance.		

Element Type		Туре	Description	
	exceptionName	String	The exception returned for the request, if applicable. Valid values: • BadRequestException - The request is missing fields or has invalid data. • NotFoundException - The requested information is not available.	
payload		ı	Required. The payload containing the response body. If the call is unsuccessful, payload is null.	
id String		String	Required. The GUID of the updated master data record.	

```

Remove Identifiers from Master Data

IT system administrators use this API to remove identifiers from company, company location, Partner, or Partner location master data.

Remove Identifiers from Master Data request

Element		Туре	Description			
hea	der		-	Required. The request header.		
	headerVersion		Integer	Required. The version identifier for the request. Valid value is 1.		
	eventName		String	Required. The fully qualified name of the request event. Valid value is masterdata-manager:delete-identifier:v1.		
	ownerld		String	Required. The identifier for the company providing the app.		
	appName		String	Required. The application that owns the event. Valid value is masterdata-manager.		
	dataspace		dataspace		String	Required. The dataspace within the environment where the request is being made. Valid value for the Production and Validation environments is default.
pay	load		-	Required. The request body.		
	masterDataObjectId		String	Required. The identifier for the master data record. The identifier is attached to this record.		
	masterDataObjectType		Enumeration	Required. Specifies the type of identifier that is being removed from the master data record. Valid values: • COMPANY • COMPANY _LOCATION • PARTNER • PARTNER • PARTNER		
	identifiers	dentifiers Ar		Required. Required. The identifier for company, company location, Partner, or Partner location.		
	m ass ter Da tal de nti fie rT yp eD eP			Required. The information to remove the identifier. - COMPANY - COMPANY _ LOCATION - PARTINER _ LOCATION		

Ē	Element	_	Туре	Description	
				Required. The type of the identifier. Valid values	
				AR_CUIT - 11-character Argentina Tax ID. Format is 00-00000000-0 (e.g. 33-56899856-8). Cannot be as to the Drimon Identifier.	
				set as the Primary Identifier. • AM_TIN - 8-character Armenia Taxpayer	
				Identification Number (e.g. 53663456). Cannot be set as the Primary Identifier.	
				BR_CNES - Brazil National Registry of Health Facilities Number (e.g. 3868249). BR_CNES - 14 character Persil Toull and Entitle ID.	
				BR_CNPJ - 14-character Brazil Tax/Legal Entity ID. Format is 00.000.000/0001-00 (e.g. 1116 165 (0001 71) 121 116 165 (0001 71)	
				71.116.165/0001-71). • BR_CPF - 11-character Brazil Individual Taxpayer	
				Registration Number. Format is 000.000.000-00 (e.g. 605.085.153-00). The first 8 digits identify the	
				company, the next 4 digits identify the branch or subsidiary ("0001" designates the headquarters),	
				and the last 2 are check digits. • BR_PROF_REG - Brazil Professional Registration Number (e.g. CRODFCD9952).	
				BY_TIN - 9-character Belarus Taxpayer Identification Number (e.g. 004893223). Cannot be	
				set as the Primary Identifier. • CN_CHINA_ID - Alphanumeric China identifier	
				(e.g. 352)685B548N). • CN_FOREIGN_MAH - China Foreign MAH ID (e.g.	
				0678645). • CN_FOREIGN_MFR - China Foreign Manufacturer	
				ID (e.g. 665S55D). • CN_USCID - China Unified Social Credit Identifier	
				(e.g. 9771221453). • COMPANYID – Alphanumeric internal company	
				identifier (e.g. KENDALL). • COMPANYSITEID – Alphanumeric internal	
				location, plant, or site identifier (e.g. 465MEMPHIS). • DE_IFA_REG_NUM - 6-character	
				Informationsstelle für Arzneispezialitäten (IFA) Registration Number (e.g. 548726). Cannot be set	
				as the Primary Identifier. • DEA – 9-character US Drug Enforcement Agency	
				Number (e.g. F92547851). • DUNS – 9-character Dunn and Bradstreet Number	
				(e.g. 82-759-6961). • DUNS4 – 13-character Dunn and Bradstreet	
				Number, which includes a 4 digit extension (e.g. 82-759-6961-KP89).	
				GCP – 6- to 12-character GS1 Global Company Prefix (e.g. 8856277).	
				GLN - 13-character Global Location Number (e.g. 8856277233311). To send and receive EPCIS	
				messages, companies and locations need a GLN. • HIN – Maximum 9-alphanumeric character Health	
				Industry Number assigned by HIBCC (e.g. 214Z65H00).	
				• ID_BPOM_FACILITYID - Indonesia Facility ID (e.g. 45764574).	
				IN_COMPANY_ID - India Company ID (e.g. 5423695784236). IN_GSTN - India Goods and Services Tax ID (e.g.	
				55876215). • IN_IEC - 10-character India Importer Exporter	
				Code (e.g. 0255411222). Cannot be set as the Primary Identifier.	
				IN_LOCATION_ID - India Location ID (e.g. 65874532).	
				IN_MFR - India Manufacturing Code (e.g. 00552101).	
				• IN_MRCH - India Merchant Exporter Code (e.g. 601227644).	
		id en		IN_PAN - 10-character India Permanent Account Number. The first five characters are letters, next	
		tifi er	String	four numbers, last character is a letter (e.g. AFZPK7190K). Cannot be set as the Primary	
		Ty pe		Identifier. • IN_TIN - 11-character India Taxpayer	
				Identification Number (e.g. 95684444523). Cannot be set as the Primary Identifier.	
				KG_TIN - 14-character Kyrgyzstan Taxpayer Identification Number (e.g. 56200044505998).	
				Cannot be set as the Primary Identifier. • KR_BUS_REG_NUMBER - 10-character South Korea	
				Corporate Registration Number. Format is xxx-xx- xxxxx (e.g. 324-84-22451).	
				KR_PROVIDER_CODE - 8-character South Korea Provider Code (e.g. 45632196).	
				KZ_BIN - 12-character Kazakhstan Business Identification Number (e.g. 220110668755). Cannot	
				be set as the Primary Identifier. • RU_ACCOUNT_NUMBER - 14- to 36-character	
				Russia Account Number (e.g. 19527400000001 or 19406412-0001-000a-0000-000000000022). Cannot	
				be set as the Primary Identifier. • RU_INN_FOREIGN_ENTITY - 10-character Russia Foreign Business Taxpayer Identification Number	
				(e.g. 7744000912). Cannot be set as the Primary Identifier. Only one of the following identifier types	
				can be assigned to an entity: RU - INN Local, RU - IN Foreign, and RU - INN Individual.	
				RU_INN_INDIV - 12-character Russia Individual Taxpayer Identification Number (e.g.

				Foreign, and RU - INN Individual. • SGLN - 15-character SGLN format representation	
				of Global Location Number: • Format for company entities is	
				[CompanyPrefix].[LocationRef].0 or [CompanyPrefix]0. The LocationRef segment is	
				optional. If the LocationRef is included, the first two segments contain only digits separated by the dot,	
				and must be 13 characters in total. If the LocationRef is not included, then the first segment	
				must be 12 digits, followed by two dot seperators. The third segment should always be the digit 0. For	
				example, 5398854519280 or urn:epc:id:sgln:0614141.12345.0.	
				 Format for location entities is [CompanyPrefix].[LocationRef].[sub-location identifier] or [CompanyPrefix][sub-location 	
				identifier] or [CompanyPrefix][sub-location identifier].The LocationRef segment is optional. If the LocationRef is included, the first two segments	
				contain only digits separated by the dot, and must be 13 characters in total. If the LocationRef is not	
				included, then the first segment must be 12 digits, followed by two dot seperators. The third segment	
				is always alphanumeric and can be any length, with at least one character in it preceded by the dot	
				separator. For example, 8856277.23331.6 or 53988545192811.	
				TRACELINK_ID - TraceLink Identification Number (e.g. KENDALLPHARM).	
				UZ_TIN - 9-character Uzbekistan Taxpayer Identification Number (e.g. 000181244). Cannot be	
- 1	1	1	1	set as the Primary Identifier.
