What's new in the Solution Builder, version 2025.1.0 release

Explore what's new in the Solution Builder, version 2025.1.0 release. To learn more about what's new in the OPUS Solution Environment, version 6.0.0 that provides the user interface for this app, see What's new in the OPUS Solution Environment, version 6.0.0 release.

Release information

This document describes the TraceLink capabilities included in the Solution Builder, version 2025.1.0 app release, which is available on Validation and Production on 08 Apr 2024.

The following apps are impacted by this release and will be updated to the version listed:

- Solution Builder, version 2025.1.0

Solutions supported by this app version:

- OPUS Solution Environment, version 6.0.0

The features below are in order of functional relevance (i.e. the typical order in which a user executes a function or task).

These release notes are subject to change based on the deployment of the release. In the event of changes, the release notes and any related documentation will be updated within one week of release deployment. Deployment completion can be confirmed in the TraceLink Release Notice email.

Revisions

Date	Revision	Description
08 Apr 2025	01	Initial version.

API features

There is no new or updated API functionality included in this release.

System features

The following new or updated system functionality is included in this release.

These features are changes to the app to support another feature and do not have any impacts on their own.

Improved Performance for Saving Workflows

Users can save their workflow configurations in a single operation, allowing them to quickly make and save updates to their workflows. Previously, save operations could not be rolled back easily and caused lag in the UI, leading to reduced efficiency.

Impact analysis

- Interface options:
 - None
- Business segment impacts:
 - All business segments (both Owners and Partners)

Simplified Creation of Lookup by Reference and Lookup by Value Fields

This feature includes support for automatically populating index map configuration

properties when adding Lookup By Reference (LBR) and Lookup By Value (LBV) fields. For more information about the corresponding solution feature, see the OPUS Solution Environment, solution version 6.0.0 release.

Impact analysis

The impacts for these features are the same as the Simplified Creation of Lookup by Reference and Lookup by Value Fields feature in the OPUS Solution Environment, version 6.0.0 release.

Add Standard Pick List Fields to All Page Types and Business Object Types

This feature includes support for adding and configuring Standard Pick List fields. For more information about the corresponding solution feature, see the OPUS Solution Environment, solution version 6.0.0 release.

Impact analysis

The impacts for these features are the same as the Add Standard Pick List Fields to All Page Types and Business Object Types feature in the OPUS Solution Environment, version 6.0.0 release.

Create a Subtype by Copying an Existing Subtype

This feature includes support for creating a new subtype by copying an existing subtype. For more information about the corresponding solution feature, see the OPUS Solution Environment, solution version 6.0.0 release.

Impact analysis

The impacts for these features are the same as the Create a Subtype by Copying an Existing Subtype feature in the OPUS Solution Environment, version 6.0.0 release.

Configure Properties of Custom Fields in Subtypes Without Changing

the Base Object

This feature includes support for modifying properties of custom fields in subtypes. For more information about the corresponding solution feature, see the OPUS Solution Environment, solution version 6.0.0 release.

Impact analysis

The impacts for these features are the same as the Configure Properties of Custom Fields in Subtypes Without Changing the Base Object feature in the OPUS Solution Environment, version 6.0.0 release.

Disable Save Button in Released Solutions

This feature includes support for disabling the Save button for any solution in the Test or Released state. For more information about the corresponding solution feature, see the OPUS Solution Environment, solution version 6.0.0 release.

Impact analysis

The impacts for these features are the same as the Disable Save Button in Released Solutions feature in the OPUS Solution Environment, version 6.0.0 release.

Resolved issues

Solution Builder 2025.1.0

There are no resolved issues in this release.

Known issues

Solution Builder 2025.1.0

There are no known issues in this release.
