How to Enable Supply Chain Orchestration While Supporting SAP ECC to S/4HANA Migration

At FutureLink Boston 2025, Janel Firestein, Partner and Life Sciences Industry Lead at Clarkston Consulting, shared expert guidance on how to pursue intelligent supply chain orchestration—even while navigating a complex SAP ECC to S/4HANA migration. Drawing on decades of experience helping life sciences companies manage ERP transitions, Firestein outlined how organizations can align IT modernization with supply chain innovation and real business value.

In this practical session, Firestein explains how TraceLink and Clarkston are working together to deliver out-of-the-box MINT integration accelerators for SAP customers. She emphasizes the importance of mapping your entire enterprise architecture, investing in data quality, and seizing opportunities for faster value delivery—even amid long-term transformation. The discussion includes real-world examples of how companies are using MINT to bypass integration delays, unify fragmented systems, and enable end-to-end visibility without waiting for multi-year ERP projects to finish.

Watch to learn:

- How to identify and prioritize value-generating supply chain initiatives during an ERP migration
