This document describes the TraceLink capabilities included in the Administration, solution version 10.0.0 release, which is available on Validation on 24 April 2025 and Production on 22 May 2025.

The following solutions are impacted by this release and will be updated to the version listed:

- Administration, solution version 10.0.0

  Apps that support this solution version:

  - Administration, version 2025.1.0

⚠️ This Help Center is subject to change based on the deployment of the release. In the event of changes, the Help Center will be updated within one week of release deployment. Deployment completion can be confirmed in the TraceLink

Release Notice email.

Revisions

Date	Revision	Description
27 Mar 2025	01	Initial version.
24 Apr 2025	02	The following updates have been made since the previous revision was distributed: • 3 issues are added to Resolved issues • 0 issues are added to Known issues.

UI features

The following new or updated functionality will be included in this release.

Manage B2B Integrations

Enable Partners to View Owner Company and Locations

The Location Settings tab is now renamed to Link Settings. While configuring company Link settings for a B2B connection, Partners can now view information about the Owner company and company locations under Company or Location ID field. Previously, only the Owner could view their company, locations, partners, and partner locations.

Impact analysis

- Interface options:
    - Web UI.
- Business segment impacts:
    - All business segments for Owners and Partners.

Edit Message Settings for Partners

- The Inbound-Outbound tab is renamed to Message Settings.
- **Create Message Settings** - Message settings are created by default for owner and partner by adding a Partner company, Partner location, or Owner location in any TraceLink app through a link If the Partner company link is

removed from all networks for that application, then message settings is also deleted. Previously, separate configurations for inbound-outbound messages settings were created only by using Configure inbound and outbound Message settings on the message settings screen.

- **Edit Message Settings for Partners** - Partners can now edit Message Settings configurations for links where they are added as a partner by editing the Link Identifier field in the Link section and updating the delivery options in the Message Delivery Rules section. This functionality enables Partners to customize message settings to align with their specific integration requirements and ensure efficient data exchange. Previously, only Owners could edit the Link and Message Delivery Rules sections.

Impact analysis

- Interface options:
  - Web UI.
- Business segment impacts:
  - All business segments for Owners and Partners.

B2B Integration Enhancements

- **Location Settings Enhancements** - The following updates have been made to the Location Settings tab on the B2B Integration screen to ensure that the B2B Integration terminology is consistent across all TraceLink apps:
  - The Location Settings tab is renamed to Link Settings.
  - The Connection Type column on the Link Settings tab is renamed to Choreography Type.
  - The Connection Type Information panel on both the Configure Linked Integration Settings and Edit Linked Integration Settings screens are renamed to Choreography Type Information.
  - The B2B Connection column on the Link Settings tab is split into two separate columns to improve clarity and data management:
    - B2B Connection - Displays the name of the B2B connections

established.

- Connection Type - Displays the type of B2B connection, e.g. SFTP, AS2.

- **Team Displayed on Integration Principals Tab** - When a System Administrator adds a Team while adding integration access, the Integration Principals table is enhanced to display the Team name in a dedicated column alongside the Application, Network, and Role. This enhancement simplifies the management of integration permissions. Previously, the Integration Principals table displayed information about Application, Network, and Role.

Impact analysis

- Interface options:
  - Web UI.
- Business segment impacts:
  - All business segments for Owners and Partners.

Configure Multiple Message Types

This feature introduces the Message Type drop-down in the OTHER Choreography Type section on the Configure Link Settings screen, allowing System Administrators to add multiple message types, each with its corresponding Message Code and Message Function. This ensures accurate message configuration for different B2B message types. Previously, user could add one message code and message function for each link settings.

Impact analysis

- Interface options:
  - Web UI.
- Business segment impacts:
  - All business segments for Owners and Partners.

Enhancements for Networks

- Selecting Company Solution under Add Network and Edit Network now displays both active and inactive solutions.

- The Solution names under the Add Network and Edit Network field has been renamed to enhance consistency across the user interface:

    - Base Solution is renamed to Standard Solution.

    - Custom Solution is renamed to Company Solution.

Impact analysis

- Interface options:
    - Web UI.
- Business segment impacts:
    - All business segments for Owners and Partners.

Resolved issues

Administration, solution version 10.0.0

The following issues are resolved in this release. The prefixes are for internal TraceLink tracking purposes and do not mean anything to customers.

ID	Interface	Issue Description
CMCP-38547: External Users Not Added to POET Network	UI	A backend data error was preventing users from adding external users to the POET Network. This issue is resolved.
CMCP-37711: Custom Solution Name Missing in the UI When Editing Network	UI	The Custom Solution Name field was missing in the UI when editing a network. This issue is resolved.
CMCP-38597: Memberships Deleted Due to Implementation Error	UI	Removing a role from a link was erroneously deleting both owner and partner memberships. This issue is resolved.

Known issues

Administration, solution version 10.0.0

There are no known issues in this release.
