U.S. Healthcare System Targets Millions in Procurement Savings

A leading U.S.-based healthcare system with over $500 million in annual pharmacy spend has selected TraceLink's MINT platform to fully digitalize its procure-to-pay operations and unlock millions in direct spend savings.

Faced with manual processes, fragmented integrations, and limited invoice visibility, the health system is leveraging MINT's Integrate-Once™ model to streamline supplier collaboration and accelerate payment cycles—ensuring timely delivery of life-saving medications.

By connecting its ERP to all suppliers through a single integration, the organization gains real-time visibility into orders, shipments, and invoices—empowering procurement leaders with actionable insights via no-code dashboards.

Target KPIs:

- 7% direct spend savings
- 4 weeks to first partner go-live
- 100% supplier invoice visibility

Key Challenges:

- Eliminate costly point-to-point integrations
- Capture pre-pay discounts and avoid late payments
- Automate payment processes

MINT orchestrates seamless collaboration across hospitals, pharmacies, 3PLs, and manufacturers—helping the healthcare system reduce risk, cut costs, and improve patient outcomes.
