UI Features

The following new or updated functionality will be included in this release.

Next Generation UI Enhancements for Master Data

The Master Data, solution version 16.0.0 introduces an updated UI enabled by TraceLink's OPUS Ensemble release, which provides an improved layout and navigation system that simplifies the user’s journey across multiple TraceLink

networks and next-generation solutions. The Administration Help Center is updated to reflect the new UI and can be referenced for more information.

System features

The following new or updated system functionality will be included in this release.

Support for Standardized Drop-Down Lists in Master Data Solution

This release includes support for using standardized drop-down lists in the Master Data solution. A standardized drop-down list is a predefined list of values that can be referenced across multiple TraceLink solutions. They ensure data consistency and interoperability across all TraceLink products. Additionally, standardized drop-down lists enable TraceLink to update the list's values independently from a solution release.

Impact analysis

- Interface options:
  - There are no UI or API impacts.
- Business segment impacts:
  - All business segments for both Owners and Partners.

Resolved issues

Master Data, solution version 12.1.0
