Leading U.S. Pharmacy Digitalizes Financial Reconciliation Process with TraceLink

A leading U.S.-based pharmacy, with over 500 national locations and $10B+ in revenue, selected TraceLink's MINT platform to protect revenue, ensure product availability, and improve customer service by digitalizing its financial reconciliation process.

Faced with manual reconciliation efforts, siloed enterprise data, and limited visibility into supplier transactions, the organization is leveraging MINT's Integrate-Once™ model to automate real-time, four-way matching of products ordered, shipped, received, and invoiced—ensuring accuracy, compliance, and partner accountability.

By linking its ERP with its supplier ecosystem, the provider will achieve complete visibility into serialized product movement and business transactions—empowering supply chain leaders with actionable insights and automated compliance enforcement.

Target KPIs:

© TraceLink Inc. 2009 - 2025 All Rights Reserved

- 90+ suppliers onboarded
- $0 cost to suppliers for integration
- 100% four-way match accuracy

Key Challenges:

- Manually reconciling EPCIS data with strained internal resources
- Disparate enterprise data silos slowed accurate validation and reconciliation
- A lack of automation delayed vendor accountability and increased human errors

MINT orchestrates seamless collaboration across CMOs, 3PLs, wholesalers, and pharmacies—helping protect revenue, ensure product availability, and deliver better outcomes for patients.
