Meet with TraceLink at LogiPharma Digital Supply Chain Connect

LogiPharma Digital Supply Chain Connect is an exclusive, invitation-only event that brings together 100 of Europe's most influential pharmaceutical supply chain executives for high-level networking, benchmarking, and strategic discussions. TraceLink will be there to help leaders understand how they can drive new levels of productivity, agility, transparency, and cost containment by accessing and leveraging supply chain information.

This year, Shabbir Dahod, President and CEO of TraceLink, will deliver a keynote on **Agentic Orchestration of Your End-to-End Supply Chain**—exploring how AI agents, multienterprise data, and digitalised collaboration are transforming how supply chains think, act, and respond. Dahod will share how TraceLink is leading the way by linking partners, systems, and processes across the industry through real-time information and shared context—creating the conditions for agents to reason, automate, and optimise performance at scale.

Why Meet with TraceLink?

Lead the Digitalisation of Your Supply Chain

Transform your manual, fragmented supply chain into a single, intelligent network. TraceLink enables life sciences and healthcare organisations to digitalise and orchestrate every process and the critical information they rely upon—from forecasting and procurement to manufacturing and distribution—while linking you to all your supply chain partners.

Experience the Core of Agentic Orchestration: MINT, POET, and Reports & Dashboards

Discover how TraceLink's solutions form the foundation of intelligent, agentic orchestration:

- **MINT** drives real-time collaboration across multienterprise business processes by enabling digital transaction exchange between companies and systems across a company's entire supply chain.
- **POET** empowers business users with no-code tools to design, configure, and orchestrate collaborative workflows across teams, functions, and partners—supporting dozens of use cases across supply chain management, procurement, manufacturing execution, regulatory compliance, and quality management.
- **Reports & Dashboards** transform shared, integrated data into actionable insight for faster, smarter decisions across your entire supply network.

Achieve Strategic Business Outcomes

Whether your goals include increasing revenue, reducing working capital, or improving productivity and resilience, TraceLink helps you deliver measurable impact through end-to-end digitalisation, agentic orchestration, and real-time

collaboration with every partner.

Schedule Your Meeting with TraceLink
