

Supply Chain and IT Executive Panel: Agentic AI Supply Chain Impact and its Multi-Enterprise Digital Foundation

How do you turn the promise of agentic AI into measurable supply chain results? In this FutureLink Barcelona 2025 panel, George Llado, Former Senior VP & CIO, Alexion Pharmaceuticals; Prashant Salva, VP Supply Chain EU, Sun Pharmaceuticals; Torben Weilmuenster, Head of Supply Chain Management, Merz; Christophe Villain, a digital transformation leader at Nestlé; and Flavio Aliberti, VP of Life Sciences Supply Chain Consulting, Genpact; discuss where expert agents deliver impact first, and what it takes to build the multi-enterprise digital foundation—shared data, governance, and trust—to scale them across complex networks.

The conversation moves from strategy to execution: real-time signals and transparency, planning and ATP, inventory replenishment, logistics optimization, and customer-service growth opportunities. Leaders lay out the adoption playbook—set bold ambitions, start with quick wins, standardize data and processes, evolve roles (including supervising “agent teams”), and embed change management so people trust decisions made with agentic reasoning—while keeping products secondary to outcomes.

Key takeaways:

- Understand how to prioritize first use cases (planning, replenishment, ATP, route optimization) and turn real-time signals into decisions.
- Learn how to establish the digital foundations—shared data, standards, and governance—to scale agents across multiple enterprises.
- See how organizations evolve roles and operating models (agent supervision, end-to-end orchestration) to drive adoption and measurable outcomes.

Watch the panel to get a practical roadmap—from quick wins to governance—to operationalize agentic AI across your supply chain.
