Leveraging New Advances in Supply Management, Inventory/Stocking Control, and Shortage Prevention

When critical medicines are in short supply, collaboration and shared visibility across the healthcare value chain become essential. At **FutureLink Barcelona 2025**, Healthcare Chain Institute Co-Founders Monika Derecque-Pois and Charles Gloor explained how a unified, data-driven approach can strengthen supply management, inventory control, and shortage prevention.

They described how HCI's framework for efficiency, equity, evidence, effectiveness, and equilibrium helps stakeholders align on stockpiling strategies and visibility standards—building trust, resilience, and access to life-saving medicines for patients worldwide.

Key Takeaways:

- Learn how common definitions and shared data models improve collaboration across manufacturers, distributors, and regulators.
- Discover how the "Five E's" framework supports sustainable, equitable, and evidence-based shortage prevention.
- See how greater transparency and digitalization strengthen visibility, trust,
