Network Administration: Managing Your Digital Twin

Your company's digital twin is the foundation of every orchestration on the TraceLink network. At **FutureLink Barcelona 2025**, TraceLink Lead Technical Trainer Laura Flack explained how to manage and optimize your digital twin—defining process networks, linking partners, and assigning roles to ensure data and workflows are modeled accurately across your supply chain.

Flack outlined how process networks create shared digital workspaces for manufacturing, logistics, and commerce operations, and how administrators can maintain control by assigning the right permissions and access levels to internal teams and external partners.

Key Takeaways:

- Understand how process networks create shared digital workspaces for different business processes.
- Learn how to link internal and external partners to ensure accurate data exchange and orchestration.
- See how user roles and permissions maintain control and visibility across your digital ecosystem.

Watch the session to learn how TraceLink's network administration tools help you manage your digital twin and model your supply chain for scalable, multienterprise collaboration.
