# What's new in the Standard Link Actions, version 2025.4.0

## Release information

This document describes the TraceLink capabilities included in the Multienterprise Process Link, Standard Link Actions, version 2025.4.0 app release which is available on Validation on 11 Dec 2025 and Production on 10 Jan 2026.

 These release notes are subject to change based on the deployment of the release. In the event of changes, the release notes and any related documentation will be updated within one week of release deployment. Deployment completion can be confirmed in the TraceLink Release Notice email.

## Revisions

Date	Revision	Description
27 Nov 2025	01	Initial version.
11 Dec 2025	02	The following updates have been made since the previous revision was distributed: <ul style="list-style-type: none"><li>• 0 issues are added to Resolved issues.</li><li>• 0 issues are added to Known issues.</li></ul>
10 Jan 2026	03	The following update have been made since the previous revision was distributed: <ul style="list-style-type: none"><li>• The Production release date is updated from 03 Jan 2026 to 10 Jan 2026 for Production Frankfurt in Release information section.</li></ul>

## **API features**

### **Standard Link Actions, version 2025.4.0**

The following new or updated API functionality is included in this release.

#### **Exchange data with UNICEF TRVST via MINT Standard Link Actions**

Companies can use Standard Link Actions to asynchronously exchange data between TraceLink and the UNICEF systems through the XTT-Link-Actions application, using OAuth2 authentication. This integration automates data exchange between TraceLink and external systems through configurable JavaScript connectors stored in GCX or SCM. These connectors are centrally managed and version-controlled. Standard Link Actions operate asynchronously, allowing secure and reliable data transfer without requiring both systems to be online at the same time. For the UNICEF integration, Standard Link Actions have been configured to support UNICEF's TRVST system transactions. This enables automated, secure exchange of, shipment data, receipt data, inventory data between TraceLink and UNICEF's TRVST system.

#### **STE Outbound Integration for UNICEF Partner Data Exchange**

The STE Outbound integration enables MINT customers to exchange serialized product movement data with trading partners in real time. MINT customers transmit an STE Outbound file in EPICS format (product pack details) including commissioning, aggregation, and packing events.

This EPICS file is shared directly with UNICEF's TRVST system when UNICEF is a Partner on the TraceLink Network with the MINT customer. As a designated trading Partner, UNICEF receives accurate and timely product data that supports downstream supply chain operations. This integration improves data visibility, ensures compliance with serialization requirements, and strengthens collaboration between the MINT customer and UNICEF across the digital supply network.

Standard Link Actions uses the Serialization Transaction API to push the STE transaction from TraceLink to the UNICEF's TRVST system. After TraceLink processes the STE transaction, it is available for users to view or edit in the Web UI.

STE Outbound integration now supports UNICEF target markets, enabling consistent configuration and data management across all designated regions.

Following is the list of countries support:

<b>Country name</b>	<b>Country code</b>
Benin	BE
Botswana	BW
Burundi	BI
Cambodia	KH
Cameroon	CM
Egypt	EG
Ethiopia	ET
Gambia	GM
Ghana	GH
Guinea	GI
India	IN
Kenya	KE
Liberia	LB
Madagascar	MG

Somalia	SO
South Sudan	SS
Tajikistan	TJ
Tanzania	TZ
Togo	TG
Tunisia	TN
Uganda	UG
Zambia	ZM

Country name	Country code
Zanzibar*	ZN
Zimbabwe	ZW

The following new message is available for STE in this release:

- MPC\_STE\_EPCIS\_SerializedShipmentNotice\_1\_2\_OB\_V8

## Impact analysis

- Interface options:
  - API
- Business segment impacts:
  - All business segments for both Owners and Partners

## System features

### Standard Link Actions, version 2025.4.0

There is no new or updated system functionality included in this release.

## Resolved issues

### Standard Link Actions, version 2025.4.0

There are no resolved issues in this release.

## Known issues

### Standard Link Actions, version 2025.4.0

There are no known issues in this release.
