Egypt Traceability: Meet EDA Requirements and Stay Ahead of 2026 Mandates

On-Demand Webinar

Egypt's track-and-trace regulations are now in effect—and the window to prepare for local manufacturing compliance is closing.

With the **importation deadline already passed (February 2026) and the local manufacturing deadline approaching (August 2026)**, pharmaceutical companies must act now to align with **Law No. 475/2025** and avoid disruption.

Watch this on-demand session to understand what's required—and how to achieve compliance without adding complexity to your operations.

Why This Matters Now

- Egyptian authorities are ramping up enforcement for imported products
- August 2026 deadline for locally manufactured products is approaching quickly
- Non-compliance can result in **shipment delays, rejections, and operational risk**
- Manual processes and point-to-point integrations will not scale

What You'll Learn

- How to meet **EDA reporting requirements** for commissioning, packing, shipping, and decommissioning
- How to exchange serialized data using **EPCIS—without changing your existing systems**
- How to reduce manual work and **avoid file rejections and delays**
- How a **single network integration** enables compliance across all partners
- How to prepare your supply chain for **scalable digitalization and future automation**

Who Should Watch

This session is designed for leaders responsible for compliance, supply chain operations, and partner collaboration across:

- Marketing Authorization Holders (MAHs)
- Contract Manufacturing Organizations (CMOs)
- Wholesalers & Distributors
- Importers

Featured Speakers

- Dan Walles, VP, Product Marketing
- John Lawton, Sr. Principal Product Manager
- Ayman Waneis, Principal Solution Consultant

How TraceLink Helps

TraceLink enables companies to meet Egypt's traceability requirements through a **single connection to a digital supply network**—eliminating the need for multiple integrations and manual data exchange.
