Ocean shipment arrival notice (X12)

Ocean Shipment Arrival Notice, is an electronic message used by ocean carriers or freight forwarders to notify the shipper, manufacturer or, consignee when an ocean freight shipment is nearing or has arrived at its destination port. An Ocean Shipment Arrival Notice typically includes the estimated arrival date and time, details of the vessel and voyage, the port of arrival, and shipment and container identifiers. It also outlines customs clearance requirements and specifies any charges due before cargo arrival.

The Ocean Shipment Status X12 message enables proactive supply chain management by alerting stakeholders to key events like vessel departures, port arrivals, customs updates, and potential disruptions.

Contact your TraceLink Services representative for more information about integrating with this message.

- **Message Type:** MPC_OCEAN_SHIPMENT_ARRIVAL_NOTICE
