Product activities (IDoc)

The product activities report is routinely distributed to trading partners, suppliers, or upstream supply chain partners. The product activities report is issued either at set intervals or in response to significant deviations in inventory levels outside the normal schedule. The report's data enables trading partners to assess inventory levels and plan for replenishment needs accurately. By analyzing product activities data, trading partners can forecast necessary shipping quantities or propose optimal replenishment quantities for distribution centers, warehouses, or retail locations.

The product activities IDoc message sends transfer of stock and sales data information between SAP systems or none SAP systems via an IDoc basic type message.

Contact your TraceLink Services representative for more information about integrating with this message.

- **Message Type**: MPC_PRODUCT_ACTIVITY
- **IDoc Format**: PROACT.PROACT01
- **Transform Names**:
    - B2B_IDoc_PROACT_PROACT01_ProductActivity_OB_V2
