Get started

Master Data allow companies to set up their configuration on the OPUS Platform, including defining their company master data, internal locations, external Partners, and product master data.

Users with Master Data roles at companies that own or link to Opus apps have access to **Master Data**, which displays in the main menu of the OPUS Platform. Within Master Data, these companies can configure the following:

- **My company** – Administrators can view and edit their company's headquarters and add, view, and edit company's locations.
- **Partner** – Administrators can add, view, and edit partner Master Data records for partner companies and partner locations.
- **Product** – Administrators can add, view, and edit product Master Data.
