⚠ This Help Center is subject to change based on the deployment of the release. In the event of changes, the Help Center will be updated within one week of release deployment. Deployment completion can be confirmed in the TraceLink Release Notice email.

Revisions

Date	Revision	Description
26 Jan 2026	01	Initial version.
26 Feb 2026	02	The following updates have been made since the previous revision was distributed: • 0 issues are added to Resolved issues. • 0 issues are added to Known issues.

UI Features

The following new or updated functionality will be included in this release.

New CSV-Based Import for Master Data

Users can now import master data in large volumes using a CSV file in either OPUS or Track and Trace Services (TTS) format. This feature enhances the existing TTS import by supporting both formats, higher record volumes, and a more robust error-handling process. The release also documents the use of Action fields in Company Location, Partner, and Partner Location, Products imports, clarifying how specific collection entries (such as identifiers and regulatory licenses) can be deleted through the CSV import process.

Import is now available for:

- Company Location
- Partner
- Partner Location

- Product

Impact analysis

- Interface options:
  - UI
- Business segment impacts:

  All business segments for Owners.

New Transactions Feature for Master Data Imports

The Transactions feature is available exclusively to users with the Master Data Administrator role. It allows administrators to filter, view, and access import transaction details from B2B in Extensible TraceLink Transfer (XTT) and the OPUS Master Data UI. The feature provides visibility into input files, statuses, and errors to support monitoring and troubleshooting.

Impact analysis

- Interface options:
  - UI
- Business segment impacts:
  - All business segments for Owners.

Master Data UI and Usability Enhancements

The following updates have been made to improve consistency and usability across the Master Data solution:

- The Master Data UI has been enhanced with standardized labels, headings, and messages to deliver a more intuitive and consistent experience across next-generation solutions.

- The My Export menu has been removed. Users are now directed to the centralized Import/Export Files page to download imported and exported files, ensuring consistency across the OPUS platform.

- Boolean fields now display clear, descriptive labels across Master Data records.

Impact analysis

- Interface options:
  - UI
- Business segment impacts:
  - All business segments for Owners.

Resolved issues

There are no resolved issues in this release.

Known issues

There are no known issues in this release.
