What's new in the system 2026.1.0 release

Explore what's new in the Administration, version 2026.1.0 release. What's new in the user interface.

Release information

This document describes the TraceLink capabilities included in the Administration, version 2026.1.0 release, which is available on Validation on 26 Feb 2026 and Production on 26 Mar 2026.

The following apps are impacted by this release and will be updated to the version listed:

- Administration, version 2026.1.0

Solutions supported by this app version:

- Administration, solution version 12.0.0

The features below are in order of functional relevance (i.e. the typical order in which a user executes a function or task).

These release notes are subject to change based on the deployment of the

release. In the event of changes, the release notes and any related documentation will be updated within one week of release deployment. Deployment completion can be confirmed in the TraceLink Release Notice email.

Revisions

Date	Revision	Description
26 Jan 2026	01	Initial version.
26 Feb 2026	02	The following updates have been made since the previous revision was distributed: <ul style="list-style-type: none">• 1 system feature is added:<ul style="list-style-type: none">◦ Support for PDF Export on Company and SSO Audit Screens.• 0 issues are added to Resolved Issues.• 3 issues are added to Known Issues.

API features

There is no new or updated API functionality included in this release.

System features

The following new or updated system functionality is included in this release.

Support for PDF Export on Company and SSO Audit Screens

Users can now export Company and SSO audit reports in PDF format, in addition to the existing CSV option. This enhancement is available on the new Company Audit and SSO Audit screens and enables easier sharing, printing, and archiving of audit data. PDF export support compliance requirements, simplifies sharing, and improves accessibility for non-technical users.

Impact analysis

The impacts for these features are the same as the Support for PDF Export on Company and SSO Audit Screens feature in the Administration, solution version 12.0.0 release.

Support for CSV Import and Export on Company Users and Network Members Screens

OPUS Administration now supports CSV-based Import and Export functionality on the Company Users and Network Members screens. Users can export data for reporting or bulk maintenance, make updates offline, and re-import the CSV to create or deactivate records in bulk, streamlining user and network management tasks.

Impact analysis

The impacts for these features are the same as the Support CSV Import and Export for Company Users and Network Members feature in the Administration, solution version 12.0.0 release.

Resolved issues

There are no resolved issues in this release.

Known issues

The following known issues are included in this release and will be fixed in a future patch release. The prefixes are for internal TraceLink tracking purposes and do not mean anything to customers.

ID	Interface	Issue Description
TL- 99187: Creation Date Updates When API Key Status Is Changed, Causing Secret Key Visibility Reset	Processing	When the status of an API key is updated, the Creation Date is incorrectly modified, which causes the API secret key to become visible again in the UI due to the reset 30-minute visibility window.
TL-99446: Company Users Export Displays Incorrect Password Expiration Date When TraceLink ID Contains Special Characters	Processing	When exporting Company Users in detailed file format, the Password Expiration date displays an incorrect value if the Company's TraceLink ID contains special characters.

ID	Interface	Issue Description
TL-99418: TTS API Key Actions Are Not Recorded in OPUS Company Audit Trail	Processing	When TTS API key actions are performed in OPUS Administration, the actions are not recorded in the OPUS company audit trail.
