Date	Revision	Description
24 June 2026	04	The following updates have been made since the previous revision was distributed: • Issue information for Administration, solution version 12.1.1 patch is added: ◦ 1 issue is added to Resolved Issues. ◦ 0 issues are added to Known Issues.

UI features

The following new or updated functionality is included in this release.

Support for PDF Export on Company and SSO Audit Screens

Users can now export Company and SSO audit reports in PDF format, in addition to the existing CSV option. This enhancement is available on the new Company Audit and SSO Audit screens and enables easier sharing, printing, and archiving of audit data. PDF export support compliance requirements, simplifies sharing, and improves accessibility for non-technical users.

Impact analysis

- Interface options:
  - Web UI
- Business segment impacts:
  - All business segments for Owners.

Support for CSV Import and Export on Company Users and Network Members Screens

OPUS Administration now supports CSV-based Import and Export functionality on the Company Users and Network Members screens. Users can export data for reporting or bulk maintenance, make updates offline, and re-import the CSV to create or deactivate records in bulk, streamlining user and network management tasks.

Impact analysis

- Interface options:
  - Web UI
- Business segment impacts:
  - All business segments for Owners.

Support for TTS API Key Access and Management

OPUS Administration now includes a dedicated API Keys experience that enables System Administrators and TTS Administrators to create, view, activate or deactivate, and manage API keys for internal companies and locations. The feature provides secure key generation with one-time visibility of the private key, which is available for 30 minutes after creation, and streamlined status management directly from the API Keys interface.

Impact analysis

- Interface options:
  - Web UI
- Business segment impacts:
  - All business segments for Owners.

Resolved issues

Administration, solution version 12.1.1

The following issues are resolved in this release. The prefixes are for internal TraceLink tracking purposes and do not mean anything to customers.

© TraceLink Inc. 2009 - 2025 All Rights Reserved

ID	Interface	Issue Description
TL-110345: 503 SERVICEUNAVAILABLE due to huge request from OPUS	Web UI	Partner companies could not configure link settings for owners' internal linked locations because the Entity Company or Location ID field did not clearly distinguish between the linked entity and the linked entity location. Updated Link Settings in B2B Configuration to replace the Entity Company or Location ID field with separate Linked Entity and Linked Entity Location fields. This change enables partner companies to configure link settings for owners' internal linked locations more accurately and improves clarity when managing linked entities and locations. This issue is resolved.

Administration, solution version 12.1.0

The following issues are resolved in this release. The prefixes are for internal TraceLink tracking purposes and do not mean anything to customers.

ID	Interface	Issue Description
CMCP-42207: Users Cannot View Solution Version in Company Solution Field	Web UI	The Company Solution field in Network and Apps did not display solution versions and was limited to showing only the solution name with no indication of which version was applied. The field now displays the solution name and version with clear values and allows selection of available versions. This issue is resolved.
TL-102257: Company User Import Did Not Trigger Completion Notification	Web UI	The Company User import did not trigger a completion notification, leaving users unaware of the import status. The import process now displays success notifications and provides clear messages with details for invalid rows. This issue is resolved.

Administration, solution version 12.0.0

The following issues are resolved in this release. The prefixes are for internal TraceLink tracking purposes and do not mean anything to customers.

© TraceLink Inc. 2009 - 2025 All Rights Reserved

ID	Interface	Issue Description
TL-91533: EDI Envelope Party Type Drop-Down Displays Incorrect and Unclear Values for X12 Connections	Web UI	The EDI Envelope Party Type drop-down in Link Settings for B2B Configurations displayed incorrect and unclear values for X12 connections. The drop-down now displays properly formatted values with clear, user-friendly descriptions that align with the expected standard. This issue is resolved.

Known issues

Administration, solution version 12.1.1

There are no known issues in this release.

Administration, solution version 12.1.0

There are no known issues in this release.

Administration, solution version 12.0.0

The following known issues are included in this release and will be fixed in a future patch release. The prefixes are for internal TraceLink tracking purposes and do not mean anything to customers.

ID	Interface	Issue Description
TL-90836: Transform Version Field Does Not Update in Real Time After Apply in Transform Set Details Page	Web UI	When a user edits the Transform table in the Transform Set Details page and selects **Apply** in the side panel, the Transform Version field in the table does not update in real time. The updated version is reflected only after the user completes the **Save** action.
