The features below are in order of functional relevance (i.e. the typical order in which a user executes a function or task).

This Help Center is subject to change based on the deployment of the release. In the event of changes, the Help Center will be updated within one week of

release deployment. Deployment completion can be confirmed in the TraceLink Release Notice email.

Revisions

Date	Revision	Description
25 Sep 2026	01	Initial version.

UI Features

The following new or updated functionality will be included in this release.

Improve Product Master Data Display and Search

Users can now more easily view, identify, and find Master Data with the following enhancements, helping users efficiently manage product information while providing a more consistent experience across OPUS:

- **Business Type** in Product Master Data now uses a standard picklist that allows users to select a single value instead of multiple values.
- Compact collection sections on the View and Edit screens now use a two-column layout, reducing vertical scrolling and improving readability.
- Compact collection items can display combined keys using multiple attributes, making it easier to identify specific records without expanding them.
- Search includes additional filter options, including **Country Market Code**, **Product Code**, and **Product Group Code**, allowing users to narrow search results and find products more quickly.

Impact analysis

- Interface options:

- UI

- Business segment impacts:

All business segments for both Owners and Partners.

System features
