The Agentic AI Readiness Gap

What supply chain leaders revealed at FutureLink Barcelona 2026

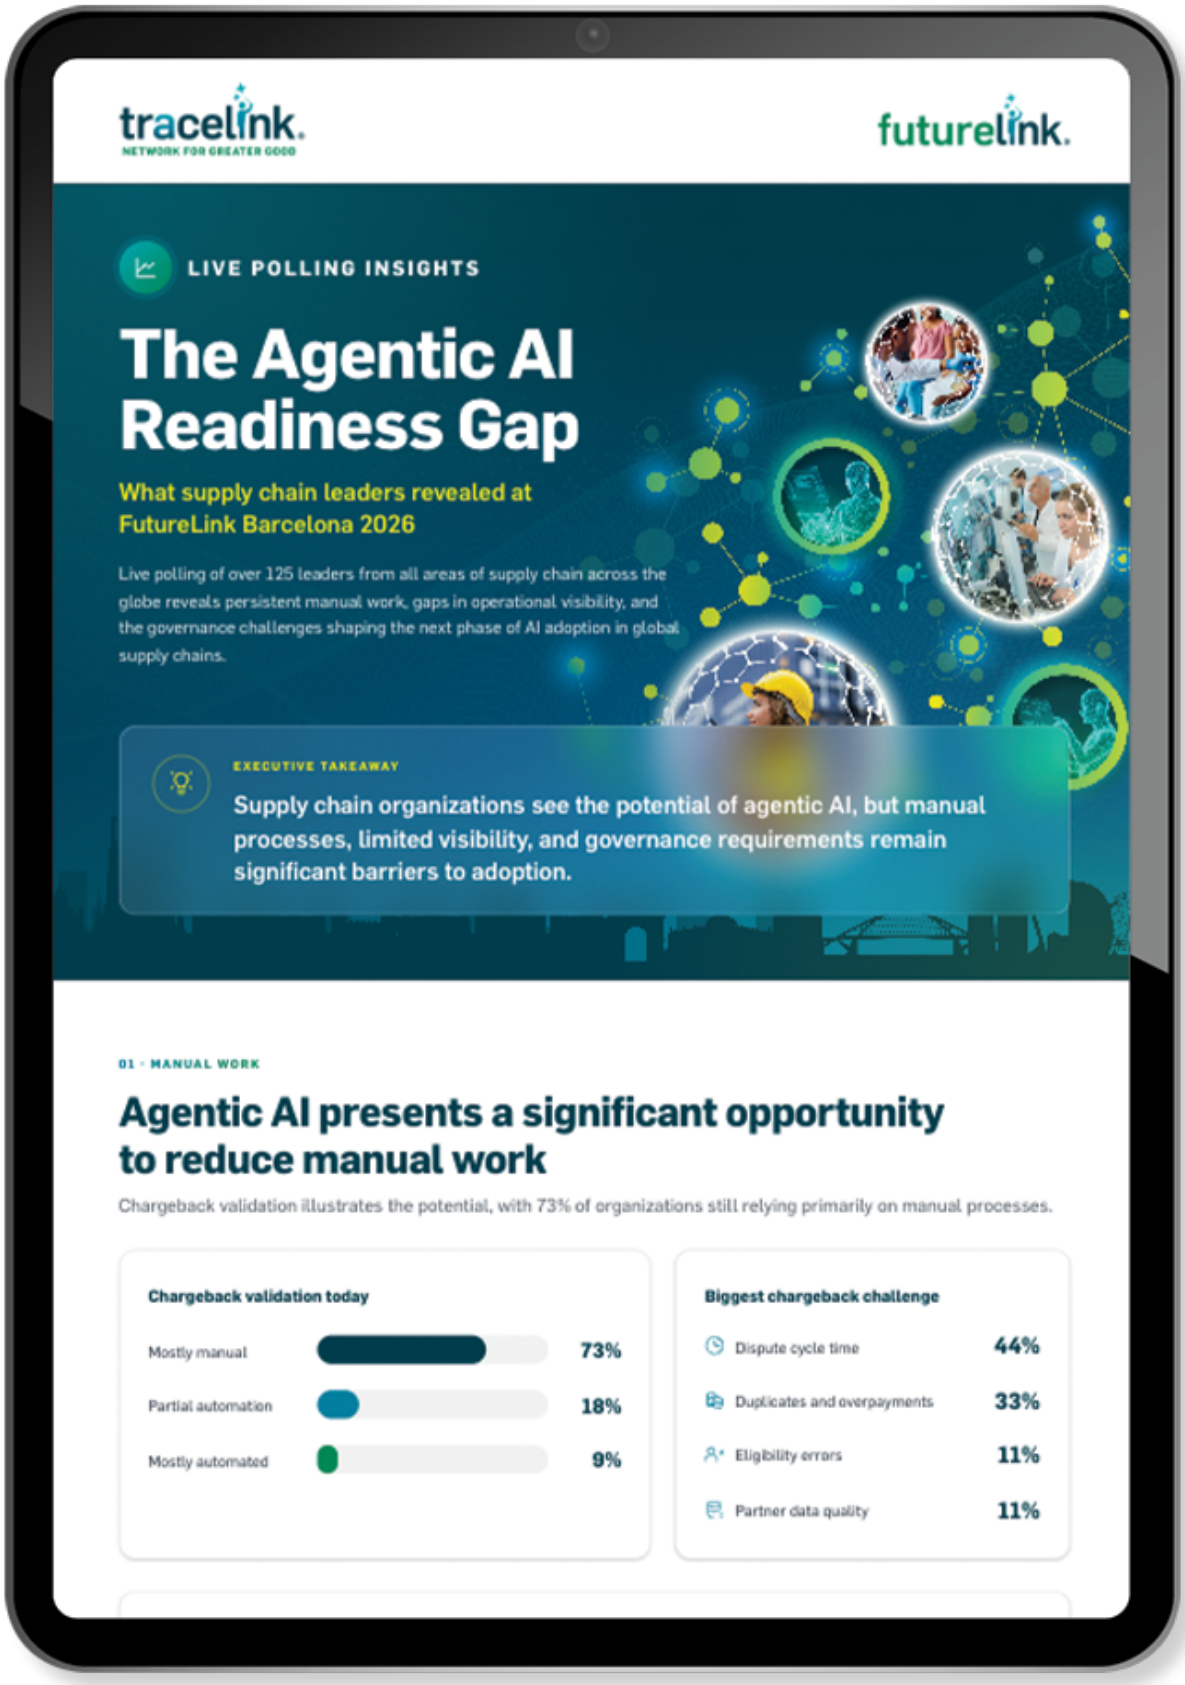

Live polling of over 125 leaders from all areas of supply chain across the globe reveals persistent manual work, gaps in operational visibility, and the governance challenges shaping the next phase of AI adoption in global supply chains.

Supply chain organizations see the potential of agentic AI, but manual processes, limited visibility, and governance requirements remain significant barriers to adoption.

Download the infographic to discover the key findings from FutureLink Barcelona 2026 and understand what it will take to prepare supply chains for agentic AI.
