Beyond Spreadsheets: How Alvotech Is Digitalizing External Supply Chain Operations for an Intelligent Supply Network

Managing a growing network of contract manufacturing organizations (CMOs) through spreadsheets, emails, and manual processes creates significant challenges for supply chain visibility, coordination, and decision-making. As manufacturing networks expand, companies need consistent, reliable data across their external partners to identify issues earlier, respond faster, and support continued growth.

At **FutureLink Barcelona 2026**, Haraldur Gardarsson, Vice President, Head of Global Supply Chain at Alvotech, shares how the biosimilars manufacturer is modernizing its supply chain operations. Joined by Brian Daleiden, Vice President of Corporate Marketing at TraceLink, Gardarsson explains how Alvotech is building on its internal digital systems by implementing TraceLink MINT to improve information exchange and collaboration across its expanding CMO network. He also discusses the importance of establishing a strong digital foundation before introducing agentic AI.
