The Roadmap to Russia Compliance Webinar Series

April 2020 Update: The current compliance deadline for all medicines manufactured in Russia or imported into Russia is July 1, 2020. As of December 31, 2019, medicines that fall under the government's HCN/7 Nosologies guidelines are expected to comply with the current serialization requirements, which comprise 4 elements: Product Code (GTIN), Serial Number, Crypto Key, and Crypto Code. Expiry Date and Batch Number are no longer required. See the latest [Russia Regulatory Updates](#) for news on Russia Track and Trace regulations.

Russia track and trace deadlines are less than 4 months away for certain medicines, and if you haven't started planning for the most complex serialization and reporting requirements in the industry, you have no time to waste. Fast-approaching deadlines, complicated choreographies, and the added complexity of cryptographic codes will require precise planning and even more precise execution.

Watch our five-part webinar series to see TraceLink's industry and product experts show you the roadmap to your end-to-end Russia compliance strategy, from understanding

the evolving regulations to managing crypto codes to delivering your first serialized unit into the Russia market. With more than 2 billion serial numbers in circulation and years of experience spanning markets across the globe, TraceLink's industry-leading global digital supply network is the backbone to our Russia Compliance and crypto code solutions.

Learn why TraceLink is the experienced partner you can rely on for Russia compliance. Register just once to access all five webinars.

Webinar 1: Russia Compliance: Moving Forward with Tight Timelines, Evolving Requirements

Russia regulations and industry interpretations are still evolving, but the deadlines haven't budged. TraceLink experts discuss how to manage through uncertainty around the regulations so that you can lay the foundation for your Russia compliance solution in time for the deadlines.

Webinar 2: Russia Compliance: Your Solution Readiness Roadmap

Russia track and trace requirements have earned their reputation as the most complex in the world. With wholly unique cryptographic code requirements; 20+ unique choreographies; 60+ transactions, events, and notifications; and sophisticated messaging management, there are lot of steps you need to take to prepare for Russia compliance well ahead of the deadline. TraceLink experts discuss the essentials of your solution readiness roadmap.

Webinar 3: TraceLink's Integrated Russia Solution: Compliance, Crypto, and Workflows

Whether you are producing pharmaceutical products inside or outside of Russia or managing warehouse and distribution operations, TraceLink's product team will help you understand how our approach addresses the unique challenges associated with the Russia market.

Webinar 4: Russia Compliance: You Ask, TraceLink Answers

From the very start, complex requirements and evolving interpretations have made for a lot of questions about Russia compliance mandates. As the dust continues to settle and the deadlines inch closer, TraceLink industry experts and solution consultants are on hand to provide clarity on some of the most frequently asked questions.

Webinar 5: Russia Compliance: Are You Ready for the Final Approach?

With serialization deadlines starting to land, the road to full serialization by January 1, 2020, is close at hand. In this capstone segment, TraceLink experts will discuss the final push toward Russia readiness and how TraceLink's solution can help you achieve success.
