DSCSA 2023 Deep Dive: The Importance of Standards to DSCSA Success

The U.S. Drug Supply Chain Security Act (DSCSA) requires all [pharma manufacturers](#), [wholesalers](#), and [dispensers](#) to implement a fully interoperable, industry-wide system for item-level traceability and the secure, interoperable exchange of transaction information and transaction statements by November 27, 2023. Your organization's ability to implement industry standards will be critical to success. Is your organization ready?

Watch our on-demand webinar, **“DSCSA 2023 Deep Dive: The Importance of Standards to DSCSA Success”** to get the information you need to navigate the various standards, blueprints, and industry activities that can help you gain a better understanding of DSCSA models and implementation recommendations. Three reasons to watch now:

1. Get a complete overview of the key standards, industry blueprints, and critical initiatives associated with DSCSA, including GS1, EPCIS, PDG, OCI, and much more.
2. Learn why adhering to industry standards is critical to achieving interoperable exchange, interoperable verification, and interoperable tracing across the end-to-end pharma supply chain.
3. See how TraceLink acts on behalf of its customers by leading industry organizations and serving as a major contributor to the standards community.

Get a step-by-step guide for implementing important DSCSA standards ahead of the deadline. Fill out the form on this page to watch the webinar now.
